NO. 16.

HORSE PLUNGES BOY INTO FLOOD

FAY HENSON, NEAR RAVENWOOD,
SAVED FROM 102 BY BOAT.

NODAWAY, 102, DOWN; PLATTE STILL RISING

Overflow Danger Transferred to East
Side of County—Continues to Rise
to Near Earlier Mark.

The flood situation of Nodaway county was transferred from the west to the east side of the county this morning, when the Nodaway river began falling steadily and the Platte continued to rise up to the height reached early this spring, when much damage was done. The 102 river is falling this afternoon at Hopkins, Pickering and east of Maryville, but awful slowly and much low land is still under water here.

An accident which came near resulting in the drowning of a young man, occurred near the municipal water plant at 10:30 o'clock last night, when Fay Henson, son of Charles Henson, four miles west of Ravenwood, was plunged into deep water between the two bridges on the state road, when his horse became scared at the raging flood.

Save Youth by Boat.
Henson jumped from the horse and clung to some willows at the south side of the road at that place until Marion Gard and Hugh Coffelt, his two companions, also on horseback, went to his rescue with a boat, borrowed at the city plant. He was carried back to shallow water and escaped with merely a bad scare. The horse had in the meantime swam to safety.

Pickering reports that the 102 river there is almost within its banks, and that the bridge across the river north of town can be crossed. The bridge east of town is still partially under water, however. The fall there began last night and continued slowly all morning.

Hopkins also reports a slow fall and that the flood waters are nearly all off the lowlands.

Falls Slowly here.
Bert Hillsbeck, engineer at the city water plant here, reported at 1:30 o'clock this afternoon that the river had receded scarcely five inches since daylight this morning, and that the state road there was still under water from a foot to two feet. It still comes up to the hub of a wagon or buggy.

The overflow is deepest between the wood bridge over the new channel and the steel bridge over the main channel of the river, and also directly east of the main bridge.

The river was still on the rise at Arkoe and Barnard at noon today. Both places reported the lowlands to be partly inundated and that the rise was quite rapid.

The Nodaway river was falling all along its channel in Nodaway county this afternoon. Clearmont reported the stream to be considerably below bank full and still falling. Burlington Junction reported the river to be within its banks and that the fall began late last night.

Use Boats at Skidmore.
Skidmore and Quitman reported a slow receding of the flood waters, but that the stream was still out of its banks. The bridge at Skidmore can be crossed in vehicles yet, but boats are

being used instead to cross the bottom to the other side of the river.

Quitman sends the report that the river there is falling but is still considerably over the lowlands. The road through the bottom can be crossed there, however, but not with automobiles.

Parnell and Ravenwood reported a steady rise in the Platte river this morning and early this afternoon. The river at Ravenwood is over its banks and flooding much low land in the bottom. The river bridge across the stream north of town cannot yet be crossed, but the state road bridge is being used slightly.

The river is also rising at Conception Junction and Guilford, and is flooding the real low lands. Conception Junction reports the river to be easily as high as early this spring. The river roads there are impassable and bridges are inundated.

A fall is expected to begin in the upper waters of the Platte river late this afternoon or tonight, however, unless further rains fall there.

BURNED WHILE KILLING LICE

Mrs. Rollie Blaine, Clearmont, Saturated Shoes With Gasoline in "Scorching" Poultry Pest.

Mrs. Rollie Blaine of Clearmont was severely burned on both feet and lower part of the legs shortly before noon today when gasoline on her shoes caught fire. She was cleaning the poultry house and saturated her shoes with gasoline to prevent the mites from crawling upon her. She then lighted a torch to burn the mites from the sides and roosts of the house.

Mrs. Blaine accidentally placed the torch too near her shoes, causing the gasoline to ignite. Before she could quench the flames her feet and legs were seriously burned. She was saved from further injury by the prompt assistance of Mr. Blaine, who had heard her screams.

TO ATTEND MUSIC MEETING.

Prof. P. O. Landon, State Examiner, to St. Joseph Convention—Others Go Tomorrow.

Prof. P. O. Landon of the Conservatory of Music will leave this afternoon for St. Joseph to attend the twentieth annual convention of the Missouri Music Teachers' association, in session there June 22 to 25, inclusive. Prof. Landon is general examiner for the state association. He also will participate in a public school music conference there Thursday.

Miss Alice Porter, Miss Eleanor Smith and Miss Bernice Rice, members of the Conservatory faculty, will leave tomorrow morning for St. Joseph to attend the convention. Several other music lovers of Maryville also are planning to attend this week.

IS POULTRY CLUB OFFICER.

A. L. Glass, Hopkins, a Township Vice President, Plans Township Contest.

A. L. Glass of Hopkins, was appointed vice president yesterday of the Northwest Missouri Poultry association for Hopkins township, J. H. Saylor, secretary, announces. Mr. Glass intends to try to get up an individual township poultry exhibit and contest in the annual show here next fall, as has been urged by the association.

It is believed that many townships of the county will accept this township plan and offer prizes to the persons from that township who exhibit fine fowls.

Only two township vice presidents have been named yet. The other is Mrs. W. P. Nicholas of Burlington Junction for Nodaway township.

MAY LET CONTRACT

COUNCIL MEETS TONIGHT TO CONSIDER PAVING AGAIN.

ITS UP TO BIDDER NOW

City Accepts Proposal of St. Joseph Firm, Which is Expected to Approve or Reject Proposition.

The formal awarding of a contract to pave nineteen blocks in the city this summer for \$35,851.25 to Young Brothers Construction Company, St. Joseph, will be considered at a meeting of the city council tonight, if the bidder accepts the provisions of the contract. Little other business is expected to come up at the special conference tonight.

The bid of the Young Brothers was the only one submitted in the third call made by the council for last Friday night. The bid was thereupon accepted and a resolution adopted to that effect. It is now up to the bidders to accept the provisions of the city's contract, before its signing tonight.

If the contract is signed tonight, it provides that paving operations must be begun within thirty days and that the paving must be completed within ninety days thereafter. It also provides that the paving shall be kept repaired and retained in good condition for five years.

The paving will be on six streets of the city. It is the first paving successfully considered by the city for several years.

SAY HE ASSAULTED BOARDER

Charles Childress Arrested on State Warrant for Battery of Estes Wyatt—Trial Tomorrow.

Charles Childress, living west of the Wabash freight depot, on North Dunn street, was arraigned in Justice R. L. McDougal's court this morning on a state charge of assault and battery on a boarder, Estes Wyatt, last Sunday. Childress pleaded not guilty. He was released on \$200 bond this morning pending his preliminary hearing in justice court tomorrow.

Childress was arrested at 6 o'clock last night by Deputy Sheriff Dee Callahan and Chief of Police E. C. Moberly. He is said to have been drunk at the time of the alleged assault.

BASE BALL TEAM UNNAMED.

Prize for Appropriate Title for Week-Day Players, Not Accepted.

The Maryville week-day base ball team still remains without a name, even though two season tickets were offered for the most appropriate and "fetching" title for it. The contest, announced last week, closed at 6 o'clock last night with not a single contribution of names. Fred Robinson, chairman of the executive committee announced.

The management of the team will probably select a name for the team soon, and thereby save the two season tickets anyway.

2 SOWS FARROWED 645 PIGS.

S. J. Icke, Near Barnard, Says One Raised 336 in 14 Years—Loses Only 9—Lost Only 13.

S. J. Icke, living eleven miles south of Maryville, near Barnard, has some prolific Duroc-Jersey sows. According to Mr. Icke he has one that has farrowed twenty-four pigs each year for fourteen years and has lost only nine of the entire 336 pigs farrowed. Another sow, he says, has farrowed 339 pigs in fifteen years, of which all were raised but four.

Mr. Icke also has four gilts that raised ten pigs each, all being farrowed last Saturday.

Visits Parents Here.

Mrs. Charles Lippman and son Cyrus of St. Louis are visiting Mrs. Lippman's parents, Mr. and Mrs. C. A. Anthony, this week.

Mr. and Mrs. Warren Jones returned Monday from a visit at Quitman since last Wednesday. Mr. Jones tried his hand at fishing in the Nodaway river, but reports that he was not very successful.

HOLD TRI-CLUB GUN SHOOT

Maitland, Skidmore and Maryville Gun Artists in Contest at Skidmore Today.

A gun club shoot between members of the Maitland, Skidmore and Maryville gun clubs is being held on the grounds south of Skidmore this afternoon, with about thirty men contesting. Among those representing the Maryville club are W. H. Tindall, Conrad Sweitzer, Dr. D. J. Thomas, Ben Chandler, Brint Embree, R. I. Souers and Bruce Johnson.

The Skidmore club of twenty-seven members will be represented by between fifteen and twenty marksmen, while Maitland sent a delegation of about a half dozen. Some fine scores are expected.

CALL OUT MILITIA

GEORGIA EXECUTIVE CALLS THE GUARDSMEN TO SAVE SELF.

MOB ATTACKS SOLDIERS

Crowds Infuriated Over Commutation of Leo M. Frank's Sentence Seek Vengeance on Governor Slaton.

Atlanta, Ga., June 22.—With several hundred men and boys clamoring to get into the front gates of his country home on Peachtree road, which had been barricaded with barbed wire entanglements, and threatening to overpower twenty country policemen, armed with riot guns, Governor Slaton called out the militia for protection.

Upon the arrival of four companies of state guardsmen, which had been held under arms and rushed to the estate in automobiles, the governor proclaimed martial law in a district extending half a mile in front of his home, half a mile back and for a distance of about a quarter of a mile on either side.

When the soldiers lined up with fixed bayonets to disperse the crowd, stones, bricks and bottles were thrown at them.

Atlanta, Ga., June 22.—More than 2,000 persons gathered in a mass meeting in the capitol grounds and passed a resolution condemning Governor Slaton's action in commuting Leo M. Frank's sentence to life imprisonment.

The crowd then marched to "Five Points," in the business center of Atlanta, and after a short halt went to the city hall. There several arrests were made after mounted police and patrolmen had made futile efforts to disperse the demonstrators.

Mounted police succeeded in keeping the crowd separated somewhat by riding in rings, rounding up the demonstrators into small detachments.

The governor's decision was announced barely twenty-four hours before the time set for Frank's execution for the murder of Mary Phagan, and after he had been taken secretly from the Fulton county jail to the state prison farm at Milledgeville.

At the mass meeting in the capitol grounds a speaker admonished everyone present to march to "Five Points" as a demonstration against the governor's action.

Governor Slaton issued a statement saying that he knew his action in commuting Frank's sentence means his retirement from public life, but that he felt that he would be a murderer if he allowed Frank to hang.

WILL ADMINISTER ESTATES.

Name Guardians for Property of James Hammond and John R. Hayes.

Administrators for two estates were announced this morning by Miss Mabel Hunt, deputy in probate court. Edward L. Hammond will be administrator for the estate of his father, James Hammond, who died in Maryville, June 14.

Lawrence M. Hayes will be administrator of the estate of his brother, John R. Hayes, who died at his home here May 27.

The Mt. Airy church ice cream and strawberry social has been postponed indefinitely, on account of overflow of the 102 river.

PLAN BIG RECITAL

METHODISTS TO GIVE FREE MUSICAL THURSDAY NIGHT.

ANNOUNCE PROGRAM

Ernest L. Cox to Give Vocal Numbers, Miss Carrie Margaret Baker and Mrs. E. F. Wolfert Instrumental.

The program for the recital to be given in the auditorium of the First Methodist church Thursday night by Ernest L. Cox of Kansas City and Miss Carrie Margaret Baker and Mrs. E. F. Wolfert of Maryville, was announced today by the Rev. G. S. Cox, brother to Ernest L. Cox. Olin M. Cox of Kansas City, another brother to the local pastor, will be accompanist to Ernest L. Cox.

Miss Baker will start the recital with an instrumental number from Chopin. Mr. Cox will then give three vocal numbers and an encore, after which Miss Baker and Mrs. Wolfert will give an instrumental duet. All of Miss Baker's numbers will be instrumental. Mr. Cox will entertain entirely with vocal numbers.

The recital was to have been held Friday night, but on account of other entertainments in the city that night, it was set ahead one day. The musical will be free to anyone, Mr. Cox announces. The recital was planned because of a visit the brothers planned here the latter part of this week, to the Rev. Mr. Cox.

Here Is The Program.

The program for the recital follows: Scherzo, B flat Minor, Chopin—Miss Baker.

a. Sword of Terence, Bullard. b. Ich Waende Unter Blumern, Meyer-Helmund.

c. Morning's Lullaby, Jamison. Encore, Irish Courtship.

—Ernest L. Cox. Grande Polonaise Brillante, Chopin. Miss Baker and Mrs. Wolfert.

a. Kings of the Road, Bevan. b. Wo! Hahn.

c. The Day is Done, Spross. Encore, Irish Names.

—Mr. Cox. a. Soaring, Schumann. b. Bird as Prophet, Schumann.

c. Etude, C sharp minor, Schumann. —Miss Baker. a. Memories, Downing.

b. I Know of Two Bright Eyes, Cluttsain. c. My Little Love, Hawley.

Encore, Sweet Miss Mary. —Mr. Cox.

NO MORE OVERDRAFTS.

All the Banks Will Cut Out Practice, As It Is Illegal and Unauthorized Business.

The state banks and trust companies in Maryville received notice this week from the state banking department, J. T. Mitchell commissioner, to keep out overdrafts. Mr. Mitchell, in writing, says:

"The comptroller of currency is making a special effort to keep out overdrafts in national banks. Probably from the fact that competition is responsible for much of this practice, he has asked the different state banking departments to co-operate in this direction. This seems an opportune time to correct this growing evil.

"My views on overdrafts are generally known to banks and trust companies in this state. I have tried to impress upon them that large overdrafts are a reflection on the management of the institution, as it indicates a looseness of business methods that should not prevail."

The Maryville banks will take steps to keep out overdrafts.

The First National bank was notified by the comptroller of currency at Washington some weeks ago about overdrafts and promptly took action against the practice.

Gets Assessment Books.

E. D. French of Skidmore, assessor for Monroe township, came to Maryville today in company with Elmer Howden to get the assessment books for this year's assessments. He will begin the assessment about July 1.

A marriage license was issued in St. Joseph yesterday to Alex C. Waldier of Parnell and Miss Margaret E. Collins of Maryville.

MAITLAND REPLACES HOPKINS

Base Ball Team Held Up by Floods, so Holt County Players Come Today for Game.

The Hopkins base ball team was unable to come to Maryville today on account of high waters, so the Maitland team will play the week-day team of Maryville on the Normal athletic grounds at 4 o'clock this afternoon instead. The Maitland team is said to be fairly strong and capable of showing the local players a good tussle for the victory.

Wakeman will pitch for Maryville, while Lawrence Keeler, who has been attending St. Mary's college, St. Mary's Kan., will replace Walter Wray on third base. Wray will supplant Mastellar at the initial sack, as Mastellar will not appear in the game today.

\$611 TO OBSERVE FREEDOM

Negroes Canvass for Fund to Celebrate Emancipation Day Here August 4—Is an Old Custom.

The celebration of the emancipation of the negroes of the West Indies on August 4, 1834, which the negroes all over the country observe, will cost the negroes of Maryville this year \$611.25, according to an estimate announced today by the committee which is soliciting funds. It seems like a large amount, but when it is learned that the leaders lost last year, with nearly as large a fund to draw from, the aspect is changed somewhat.

The negroes here have celebrated the day for over thirty years.

The soliciting committee consists of Oliver Vance, chairman; James Palmer and Arthur Smith. They began the canvass yesterday, and so far have done fairly well. The celebration will be held Wednesday, August 4, either in the Franklin school park, North Main street, or in the fair grounds, East First street.

Too Cold January 1.

It is generally believed that the negroes of America celebrate their own freedom, but such is declared to be untrue. It is in reality the observance of the emancipation of the negroes of the West Indies by the British, when 700,000 slaves were set free.

The emancipation of the negroes of the United States was declared September 22, 1862, and became effective January 1, 1863. Clarence Baker, a negro leader of Maryville, this morning said, however, the celebrations were held in August, because it would be too cold to make such observance on the real emancipation day, January 1.

Here's How Money Goes.

The expenses for the celebration this year, as estimated by Vance, follow: Band from Omaha.....\$270.00 Speaker.....21.90 Speaker.....19.35 Advertising.....60.00 Attractions.....150.00 Platform.....18.00 Seats.....10.00 Dray.....4.00 Ice.....2.00 Reading.....2.00 Cabs and bus.....12.00 Bunting.....7.00 Special from St. Joseph.....35.00

Total.....\$611.25

DEMENTED SON IS DROWNED?

M. H. Pearson Hears Seson, Who Escaped from State Home, Meets Death in Ohio River.

M. H. Pearson received a telegram last night from R. P. C. Wilson, superintendent of the home for feeble minded at Marshall, that his son, Albert Pearson, who escaped from there about a week ago, had been drowned in the Ohio river near Henderson, Ky., according to word received from that place by Mr. Wilson.

The telegram says that the description of the young man tallied with that of Pearson, and that further particulars would be sent in a day or two.

RUST IN GRAIN; FIELDS TOO WET

FARMERS FEAR ABILITY TO GET BINDERS IN FIELD.

POTATOES ROTTING IN DAMP BOTTOM GROUND

Decay of "Murphy" Reported in Lowlands—Oats Fine—Heavy Rye and Wheat Down.

With the wheat and rye harvest approaching closely, farmers of Nodaway county are puzzled as to the ability to harvest the crop when it really does ripen, on account of the continued rains of the last few weeks. Not only that but the continued damp weather and overcast skies have rusted some fields of wheat badly, it is reported.

Some of the heavier fields have been packed down by the wind and rain. Farmers say it will be hard to operate a binder in some fields if it rains any more before harvest.

The rye is expected to be ready to harvest about the middle of next week, while wheat will be ripe about July 1, it is generally reported. Some will ripen slightly earlier perhaps. Oats are doing fine so far and the rain has come too early to rust it. This crop will probably be ripe about July 1.

Potatoes Are Rotting.

The corn crop is now looking fine and most of the farmers have made the second plowing. It stands on an average of knee high, though some is higher. Some fields have gotten very weedy and grassy on account of the continued wet weather.

James Hostutter, thirteen miles northwest of Maryville, in the city today, said much rust was evident in the wheat and rye fields, though no black rust had been observed in his neighborhood yet. All is of the "red" variety, which is not particularly damaging to the wheat grains, except to shrivel them slightly.

Some farmers along the river bottoms complain that the wet weather has caused many potatoes to rot or decay.

DRUGGIST LIBELED; \$751

Richard A. Walker, Skidmore, Damaged by Dr. Frank A. Lee, St. Joseph Jury Finds—Hurt Credit.

Richard A. Walker, a Skidmore druggist, was awarded \$750 punitive and \$1 actual damage by a jury in circuit court at St. Joseph, at 10:30 o'clock this morning, against Dr. Frank A. Lee, a former resident of this county, for libel. The jury deliberated an hour and a half. The case was heard yesterday, G. R. Ellison and W. A. Blagg of this city being counsel for Walker. Dr. Lee is said to have written a letter to a St. Joseph drug firm, injuring the credit of Walker. Lee denied authorship of the letter in the hearing yesterday. Dr. Lee formerly practiced medicine at Quitman, later in Skidmore, and recently went to California.

Prof. and Mrs. J. W. Dyson of Fayette arrived Sunday night to be the guests of Mrs. Dyson's parents, Mr. and Mrs. E. B. Sheldon.

Mrs. A. D. Arnett has returned from Pawnee, Okla., where she has been visiting her mother, Mrs. W. H. Whitaker, for two weeks.

Northwest Missouri captured a number of agricultural prizes at the Panama-Pacific exposition.

The indications now are that the income tax returns for this year will amount to more than \$83,000,000, which will reduce the treasury deficit to comparatively insignificant proportions. So the enemy will have to abandon this and charge on the administration from some other direction.

Kansas has one Democratic United States senator and six Democratic members of congress. The Republicans are claiming that they will be able to capture the whole bunch because the Democrats have allowed themselves to become divided over national prohibition and other questions. Democrats in other states would do well to take note and sit steady in the boat if they desire success next year.

A negro "trusty" at the Joliet, Ill., penitentiary is supposed to have attacked and murdered the beautiful wife of the warden during his absence Sunday. The warden had adopted an "honor system" by which a number of prisoners with good records had been allowed unusual latitude and were made house servants. Reports say that this man had access to the bedroom of the warden and his wife at all hours to wait upon them, that he was wont to bring her the morning paper at 5:30 in the morning, to bring her water, take her pet dog for an airing, etc. Just why a woman would place herself at the mercy of criminals who have been for years in restraint is past understanding, and indicates that the warden himself lacked common ordinary horse sense.

In the early spring Russia won a great victory over the Austrians and Germans and forced them across Galicia and over the Carpathian mountains. Germany kept her big gun factories going day and night until she was good and ready, and started in again. She caught Russia short of big guns and ammunition and has administered to her enemy a terrible licking in return. Russia still has an abundance of men and they are desperate fighters, but they can't stand before the tremendous guns brought to bear upon them. Russia is hemmed in so that she must get supplies mainly through her Asiatic seaports at a great distance and with inadequate railroad service. Russia can give some expert testimony on the difference between unpreparedness and being prepared. Likewise can Great Britain and France.

Returns to Shelbyville.

Mrs. Vernon L. Drain left Monday afternoon for her home in Shelbyville, after a visit with her mother, Mrs. Martha E. Turner, and her sister, Mrs. Augusta Romasser.

COBURN PLAYERS NEXT WEEK

To Appear at the Normal Next Monday and Tuesday—To Give Three Good Dramas.

The Coburn Players, who will appear at the State Normal school on next Monday and Tuesday, and will present Hazelton & Benrimo's wonderful play, "The Yellow Jacket," on Monday evening, and Moliere's "The Imaginary Sick Man," at Tuesday's matinee, and "A Midsummer Night's Dream" at the evening performance Tuesday, will be well received here, as they appeared here last summer at the Normal and favorably impressed the crowds of students and the town people.

"The Yellow Jacket" is the famous play of the day, and the most extraordinary dramatic production of this or any other year. Five months it stayed at the Fulton theater, New York, and the last four weeks it turned away people at every performance. It is described as "a Chinese play done in a Chinese manner." This means nothing to people who have never seen a Chinese play. The story might as well be American as Chinese. It would fit into the drama of any other country as well as it does into the theatricals of China and the United States. It is a story of a young man who, shortly after his birth, is deprived of his parents, is fostered by an honest farmer and his wife, finally falls in love with Plum Blossom and cannot marry her until he discovers who his ancestors were. "Ancestors" in a Chinese play are equivalent to fame and fortune in a drama of the western world.

"WU SIN YIN" THE GREAT, In "The Yellow Jacket."

Upon reaching the age of 20 he decides to go out and find out who were his ancestors, just as some other young man born and brought up in some other country would go out in search of his fortunes. The search takes him through adventures, trials and troubles not unlike those that are befalling young men in any other country today. The love of his mother, Chee Moo, which is constantly with him, and the love of little Plum Blossom, whose slipper he carries, added to his own integrity, bravery and love of honor, truthfulness and family, bring him through all these vicissitudes, cause him to find his ancestors and take him back to the girl of his heart. It is not an unusual story, but it is presented in an unusual way.

The costumes are wonderful old embroideries imported from China and worn by generations of Chinese actors. Some of them are over 400 years old. Contrary to somewhat widespread opinion, the comedies of Moliere are not of the "high-brow" variety that holds an appeal only for the serious student of the classics and those deeply learned in the drama. This is especially true of "Le Malade Imaginaire" (The Imaginary Sick Man) which the Coburn Players will give.

It has been well said that Moliere is for all ages of men; for youth there is his comic invention, his drollery, his frank fun; for the older spectator there is appreciation of his insight into human motives and his marvelous skill in portraying them, and for everyone who takes an interest in the comedy of human endeavor there is to be found in Moliere what he needs. Mr. Coburn has given his customary care and personal attention to every phase of the production of this addition to his repertoire, and it will be presented by a company of artists especially chosen for their fitness for the many sprightly parts.

"A Midsummer Night's Dream" has been pronounced by many scholars the most difficult of Shakespeare's plays to produce adequately. In fact, more than one authority has gone a little too far ahead of his time in saying it was unactable, and it is with full realization of the difficulties to be overcome that Charles Deville Coburn has

MISSOURI SUFFERERS FIND GREAT REMEDY

Thousands needlessly suffer from stomach ailments, handicapped in their work and pleasure. The stomach is the mainspring of life and the body cannot run without it. You want to be well quick.

A great many people in Missouri and thousands all over the country have found the way to health by the use of Mayr's Wonderful Remedy. The first dose shows results. Here are the words of two Missourians:

Mrs. J. B. Trullinger of Norborne, Mo., wrote: "Words cannot express my appreciation of your medicine. I have felt fine all summer and fall. Am gaining weight."

W. T. Jennings, cashier of Bank of Bois D'Arc, Mr., writes: "Please send four more bottles of the stomach remedy. Both my wife and I use this medicine and think it truly wonderful."

Mayr's Wonderful Remedy gives permanent results for stomach, liver and intestinal ailments. Eat as much and whatever you like. No more distress after eating, pressure of gas in the stomach and around the heart. Get one bottle of your druggist now and try it on an absolute guarantee—if not satisfactory money will be returned.

waited so long before giving a version which he thinks worthy of what is expected of him as a producer. With a knowledge of his deep respect for tradition, coupled with his sympathy for modernity, it will be interesting to witness this blithe fairy play as the Coburn Players will present it.

TO PREVENT MEATS SOURING.

Tells How Cured Hams May Be Kept Sweet in Damp Weather.

In explaining the need of care in keeping cured meats sweet in damp weather, P. F. Trowbridge of the department of agricultural chemistry says:

"It should be emphasized that mold does not spoil cured meats. Some persons in purchasing country cured hams insist that the mold shall be left on as a proof that the meat is genuine country cured. Some recommend dipping the meat in boiling hot water to stop the molding. This is only temporary, as the mold will start to grow again if the damp weather continues.

"In prolonged seasons of wet muggy weather cured meats are certain to mold. This molding of cured meat can be checked by hanging the meat where there is a good circulation of air. Cured meats should never be hung in a damp basement. If the smokehouse is tight enough to keep out the skipper fly so that the meat is left hanging in the smokehouse a smudge built every week during damp weather helps keep down the mold.

"Sacking of meats does not stop the molding. If meats are wrapped tight to keep out the skippers the wrapping should be done first with cloth and then with paper. If paper is used first it will stick badly to the meat after it molds. We find it a very good practice to encase the meat in a paper flour sack, tying the neck of the sack very tightly around the string by which the meat hangs. The meat is then hung so that the pieces do not touch each other. Molding is reduced to a minimum and the meat is protected from skippers."

In 1910 New York City had in its population 19.3 per cent of persons of native parentage, 36.2 per cent of persons of foreign or mixed parentage, 40.4 per cent foreign born, and 1.9 per cent negro. Manhattan Borough had 47.4 per cent foreign born. In New York state 30.2 per cent were foreign born.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a running ear or a deaf ear, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Expert Advice to Automobile Owners.

I have a leather faced cone clutch and wish to put on a new one. I want to know the best kind of leather I can get for the purpose; also how to put it on. Would asbestos be better than leather?

Either leather or an asbestos fabric may be used with satisfaction. If you use leather you should obtain friction leather, which is made for this purpose.

In ordering the facing, the diameters of the two edges of the cone and the width of the cone should be given. If an asbestos fabric is used, care should be taken to obtain a piece that is made for the size of cone you have. Unlike leather, strips of this material to fit cannot be cut from a large piece of fabric. The thickness of the facing is important because too thick a facing will prevent the cone from properly entering the flywheel. One-quarter inch is an average value.

If you desire to buy a piece of leather and cut your own facing you should remove the old clutch leather and use it for a pattern. Before applying the leather it is well to soak it in a neat's foot oil to soften it. Care should be taken to cut the leather to the correct length. The best way is to first rivet one end and then wrap the leather around the cone in such a manner that it slips down over the smaller end of the cone. Then pull it tight and rivet the other end. Now push the leather up in place all around and it should be tight and unwrinkled.

The same advice applies to putting on an asbestos fabric, but there is less danger of the facing wrinkling.

Will you explain fully the method of fitting and lapping in new piston rings? Place the cylinders on the bench and apply some ground glass and oil to the interior. The ground glass should be very fine. Then place the piston in the cylinder and work it in and out until the rings are well polished and fit tightly. Lapping is an operation which requires an experienced man. Furthermore, it is advisable to use an old cylinder wherever possible, as there is danger of wearing the new cylinder.

HERE'S HOW YOU TOOK COLD.

Kissing Distributes Germs and Causes Throat Troubles—So Quit It.

One who likes to observe fashions in human conduct cannot help concluding that kissing is no longer a universal feminine custom says the Youth's Companion. Women have learned to meet and part, at least in public places, without open endearments, which is an excellent thing both as a matter of good taste and of hygiene.

Foolish customs often survive endless scolding on hygienic grounds, but they are usually vulnerable from the standpoint of social convention; and kissing is becoming unfashionable!

If we could only bring promiscuous kissing under the ban for everyone, how many colds and coughs and minor infections we should be spared!

We cannot think of forbidding the kiss between parents and children, or between brothers and sisters, and yet everyone ought to exercise the greatest caution, especially during the winter months, when colds and gripes are prevalent, especially among families that are predisposed to such infections. Why do we calmly exchange the germs of a complaint that we sternly isolate after it has decimated itself?

Affection can be shown without the touching of lip to lip. No caress is more charming than the gentle touch of cheek to cheek that well bred Frenchwomen use; parents ought to teach little children to do all their kissing in that way. Even people who are in perfect health harbor microbes that can cause violent illness in those who are susceptible to them.

Certain germs, those of pneumonia, for instance, are very often present in the mouth and throat; they are, for the time being, harmless to their host, but might be fatal if communicated in a kiss to someone more susceptible to their poison.

Many persons continue the practice of kissing long after they have learned its dangers, because they fear to be misunderstood; but there are other and harmless ways of showing their affection. Select one of them and accustom those you love to that. You will find that they will soon regard the new caress quite as welcome as the kiss.

Various Measures of Stone.

Owing to the variety of uses to which stone is put, there is no regular unit of measurement employed by the quarrymen, the stone being sold by the cubic yard, cubic foot, ton, cord, perch, rod, square foot, square yard, square, etc. Building and monumental stone, especially the dressed product, is usually sold by the cubic foot or the cubic yard, although this unit varies with the class of stone and with the locality; a large quantity of rough stone is sold by the perch, cord, or ton.

Rubble, or riprap, including stone for such heavy masonry as breakwater and jetty work, are generally sold by the cord or ton. Flanking stone and stone for chemical use—as for alkali works, sugar factories, car-

TO CELEBRATE THE FOURTH.

The White Cloud Community to Have Celebration in Ed Busby's Grove.

A Fourth of July celebration will be held by the White Cloud community on Saturday, July 3, in Ed Busby's grove, a half mile west of the White Cloud church. Speakers will be secured and there will be a base ball game and other features. The complete program will be announced soon.

The celebration will be more in the nature of a social good time, and it is expected that probably 1,500 people will attend.

FLOOD RESTRICTS SUPPLY

Kansas City Markets Advanced Cattle and Hog Prices as Result of Light Shipments.

Kansas City, June 21.—Corn-fed cattle advanced 15 to 30 cents last week, drawing away from the lower grades by just that much or more, bulk of the cattle selling steady for the week. Receipts today are 3,000 head, the supply being restricted by fears of high water, as well as crippled condition of some of the carriers. The threat of water damage has disappeared today, and clear skies remove all danger of flood. Packers are all buying, as the river has been stationary since morning, and will start falling today. The market was strong to 10c higher, some sales 15 cents up. Native offerings reached \$9.25, bulk of the natives \$8.15 to \$9.00.

A feature today was the sale of some prime fed steers from Canyon City, Texas, at \$9.10 and \$9.25, weighing 1,314 to 1,444 pounds average, highest price ever paid for Texas cattle on the open market. Another leading sale today was a train of 18 cars of steers from Phoenix, Ariz., fattened on ground barley, at \$7.85 to \$8.25, weighing around 1,200 pounds, including a load of bulls at \$6.65 and a load of stags at \$7.15.

These prices were very pleasing to the shippers, as was also the light shrink, the cattle taking a good fill here. Butcher grades remain firm, account of scarcity. Quarantine arrivals were delayed by washouts, although two or three trains got in late, for which buyers were waiting.

Stockers and feeders are in strong request, but supplies are limited, desirable cattle largely at \$7.25 to \$8.00, a few cattle above these prices.

In the hog division light receipts met a strong demand, and the 5,000 head that arrived sold 5c higher, most sales at \$7.55 to \$7.65, top \$7.70. The break in prices last week looked threatening.

TEUTONS CLOSING IN ON LEMBERG

Austro-German Forces Now Within Nine Miles of Goal.

MACKENZIE SEIZES RAILWAY.

Investment of City So Complete Russians Must Either Withdraw or Submit to a Siege—French Report Progress—Activity in Dardanelles.

London, June 22.—Rawa Ruska, according to a Berlin official report, is the latest Russian position in Galicia to fall into the hands of the Austro-Germans, and as the Teutons also are reported to be fighting east of this town, the investment of Lemberg must be so nearly complete that the Russians must either withdraw from the Galician capital or leave a portion of their forces there to be seized.

The German general, Von Mackenzie, is reported to have seized the railway connecting Rawa Ruska with Lemberg, thus cutting off the retreat northward of the Russians. According to the latest news from the Austrian headquarters the Teutonic allies are now within nine miles of the limits of Lemberg.

An official Turkish report indicates that there has been activity in the Dardanelles, with an allied battleship again battering away at the forts of Seddul Bahr.

In the west Paris continues to report French advances, especially in the region of Arras. Here, it is asserted, progress has been made in the direction of Souchez and the capture of several trenches has brought the attackers near the northwest of the village.

Commons Gives Cabinet Blank Check

The house of commons gave the British government a blank check to be filled up in accordance with the expenditures of the year.

In asking this indefinite credit Chancellor of the Exchequer McKenna announced that he proposed to issue a war loan, to be terminated at the option of the government between 1925 and 1945, for a sum, the only limit of which is to be the excess of the national expenditures for war and other services for the year over the revenue.

This loan will be put out at par and will bear interest at the rate of 4 1/2 per cent. The facilities for subscription are so wide that the man who has a dollar will be able to invest as easily as the millionaire. First come will be first served, as the allotments will be made on application. The lists will close on or before July 20.

Mr. McKenna's announcement of the details of this loan was made in the house of commons. The chancellor said: "The time will come when the necessity of a further loan will become apparent and a prompt decision is required as it is undesirable that a big loan should be kept hanging over the market."

The chancellor said the total realized deficit between revenue and expenditure up to last Saturday amounted to \$218,000,000. The daily war expenditures now amount to nearly \$3,000,000 and are still increasing.

COAL LOANS LOSE CASE

Government Wins Great Victory in Lackawanna Suit.

Washington, June 22.—In a far-reaching decision, which crowns with victory the government's fight to compel the railroads to disassociate themselves from their coal companies, the supreme court ordered that the Lackawanna railroad be enjoined from transporting coal of the Lackawanna Coal company under the so-called 1909 contract and reverses a decision of the lower courts, which was against the government.

Department of justice officials said the court's decision was a clear-cut victory in the government's long fight for disassociation of the railroads and their coal companies. Its effect, they said, is far-reaching.

Ten Thousand Ad Men in Chicago.

Chicago, June 22.—Ten thousand ad men are in attendance at the eleventh annual convention of the Associated Advertising clubs of the world. There was a monster advertising pageant of 8,000 persons. One hundred and fifty floats, representing allegorical scenes in American history and twenty brass bands were in the parade. The amount expended on the spectacle was more than \$100,000.

Former Congressman Cowherd Dead.

Pasadena, Cal., June 22.—Former Congressman William S. Cowherd of Missouri died here of aneurysm, after an illness of six months. He came to California last January from Kansas City. He was fifty-five years old. The burial will take place in his old home at Lee's Summit, and funeral ceremonies will be held in Kansas City. He is survived by a widow.

Three Auto Speeders Hurt.

Joliet, Ill., June 22.—Joseph Smith is dying and John Gallagher and Joseph Doyle are seriously injured, following an accident to the automobile driven by Gallagher. The machine was speeding sixty miles an hour when it struck a rut in a road between Joliet and Manhattan, somersaulted and plowed the passengers under it.

WILSON PREPARING NOTE TO BRITAIN

Will Make New Representations on Misuse of Flag.

Washington, June 22.—New representations to Great Britain on misuse of the American flag by English steamers probably will be made in the new note which is being prepared to deal further with interruptions to neutral commerce. It was stated officially that as individual complaints of such instances had come to the state department they had been laid before the London foreign office, but that the next note would again deal with the subject generally.

At the state department it was said no official information was at hand on the German charge that the German submarine U-29 was rammed and sunk by a British steamer flying Swedish colors. American officials, while not admitting that the case has a bearing on the negotiations with Germany, are curious to know how the German admiralty got its information, inasmuch as everyone on the U-29 was reported lost.

The German claim respecting the U-29 was reported by Ambassador Gerard. The ambassador has as yet been unable to give any indication of the probable date of the reply to the last American note. It is assumed from unofficial reports, however, that it may be sent next week.

THREATEN TO LYNCH NEGRO

Joliet Convicts Make Demonstration Against Murder Suspect.

Joliet, Ill., June 22.—In a demonstration against "Chicken Joe" Campbell, the negro trusty suspected of slaying the wife of Warden Allen of the state penitentiary here, 1,300 convicts gathered in the main dining hall at the noon hour, rose to their feet and cried threats against Campbell.

One hundred guards, using clubs, right and left, were required to restore order.

"Lynch him! Lynch him! Let's tear him apart!" were some of the cries that arose from all parts of the hall.

Mrs. Allen, before her marriage, five years ago, was Miss Odette Marie Bordeaux, a comic opera favorite. She was a member of the original "Merry Widow" company. She took an active part in the arrangements of the prisoners and her influence did much toward establishing the honor system which placed the penitentiary in the front rank of modern prisons.

The murderer is said to have left finger prints in the bedroom and an expert from Chicago will analyze them. Eleven convicts, including Campbell, are in solitary confinement in connection with the crime.

Camiretti Case to Be Reviewed.

Washington, June 22.—The supreme court reconsidered its denial of a review of the conviction of F. Drew Camiretti of San Francisco, on charges of violating the white slave law, and granted a review. It also granted a review of the conviction of Maury I. Diggs, convicted with Camiretti in the same case.

Villa Force Defeated by Yaquis.

Nogales, Ark., June 22.—A detachment of the Villa troops ordered south to protect foreigners in the Yaqui valley was defeated by Yaqui Indians, twenty-five miles south of Empalme, Sonora, and lost forty men and a machine gun, according to advices received here. Twenty-five men also were lost in a previous skirmish. It was reported.

British Flyer Killed by Fall.

London, June 22.—Major Lumsden of the royal army flying corps was killed while flying over the Brooklands aviation course.

Give Dinner Party.

Mr. and Mrs. Earl Haist entertained guests at a dinner party Sunday, those present being Mr. and Mrs. Alex Lyle and sons, Will and Harold; Mr. and Mrs. John Haist, Mr. and Mrs. Otis McNeal, Mr. and Mrs. Oliver McNeal and sons.

Miss Lehmer Entertains.

Miss Bertha Lehmer gave a dinner party at noon Sunday, at which she entertained Mr. and Mrs. W. B. White and daughter, Margaret Elizabeth, and Mr. and Mrs. R. S. Price.

Mrs. Willhoite Hostess.

Mrs. M. J. Willhoite was the hostess of a dinner party given at noon Sunday, when she entertained complimentary to her daughter, Mrs. Elmer Walker, and daughter, Edna, of Aurora, Kan. Additional guests were Mr. and Mrs. W. O. Walker and Miss Mildred Hughbanks.

Four Generations Present.

Mrs. E. F. Teaney gave a dinner Sunday complimentary to her son-in-law and daughter, Mr. and Mrs. D. O. Hazelrigg of DeGrey, S. D. Other guests were a granddaughter, Mrs. Nellie Manley, and two great-grandsons, Oliver and Edwin Manley of Maryville, there being four generations present.

Thompsons Give Dinner.

Mr. and Mrs. Harve Thompson entertained with a dinner party Sunday as a courtesy to Mrs. Thompson's mother, Mrs. Lillie Shelton of Sheridan, Wyo., who is visiting relatives. Plates were laid for Mrs. Shelton, Mr. and Mrs. William Job and son, Eldon; Mr. and Mrs. W. A. White, Mr. and Mrs. W. H. Davenport and daughter, Edna; Mrs. H. Davenport of Chicago; Mr. and Mrs. Ernest Shelton and children, Mr. and Mrs. J. J. Knabb, Jesse and Richard Logan.

Collins Waldeier.

A wedding of interest to the friends of both young people took place in St. Joseph yesterday, when Miss Margaret E. Collins, daughter of Mrs. S. A. Collins of South Fillmore street, became the bride of Allie C. Waldeier, son of Mr. and Mrs. A. Waldeier of Parnell, the Rev. J. J. O'Neill officiating. They were attended by Miss Belle Collins, a sister of the bride, and Mr. Albert Schmitz, a cousin of the groom. Miss Collins was one of Nodaway county's most successful teachers, having taught in the county for the past six years. The groom is a successful young farmer. Mr. and Mrs. Waldeier will make their home on a farm south of Parnell. Their many friends extend best wishes for a long and happy married life.

McCaffrey-O'Brien Nuptials.

At 8 o'clock Tuesday morning in St. Patrick's church, Miss Katherine McCaffrey and Mr. Thomas O'Brien of Ravenwood were married by the Rev. Father Niemann. The bride was attended by Miss Catherine O'Brien, sister of the groom, as maid of honor, and Mr. John O'Brien acted as best man for his brother. Immediately after the ceremony breakfast was served at the home of the bride's mother, Mrs. Ellen McCaffrey, 502 East Jenkins street, to the following guests: Rev. Father Niemann, Mr. and Mrs. Thomas O'Brien, Mr. Ellen McCaffrey, Miss Catherine O'Brien, Miss Mary O'Brien, Miss Anna Brant, Mr. and Mrs. J. H. McCaffrey, Mr. and Mrs. J. P. Leuck and children, Ellen Margaret, Mary Rose and Joseph P., Jr.; Mrs. Anna Brant, Mr. John O'Brien, Mr. James O'Brien and Charles F. McCaffrey. Mr. and Mrs. O'Brien will make their home on the groom's farm, ten miles southeast of Maryville.

McCann-O'Donnell Wedding.

Miss Margaret McCann of Clyde and Mr. J. W. O'Donnell of Gary, Ind., were married at 7 o'clock this morning at Conception abbey, Rev. Father Frowin officiating. Miss Marie McCann and Mr. Eugene McCann, sister and brother of the bride, were attendants. The bride wore a gown of white crepe meteor, with trimmings of shadow lace and pearls, and a flowing veil crowned with blossoms. She carried bride's roses. The maid of honor wore white lace over silk and carried pink carnations. After the ceremony a wedding breakfast was served at the home of the bride's parents, Mr. and Mrs. J. T. McCann of Clyde, to immediate relatives and officiating clergyman. Mr. and Mrs. O'Donnell left at noon for an extensive wedding trip through the west, which will include visits at the two California fairs, Seattle, Portland and other places of interest. They will be at home after August 15 at Gary, Ind. The out-of-town wedding guests were Mr. and Mrs. N. F. Webber and children, Marceline and Harold, of Creston, Ia.

Attorney L. C. Cook left Tuesday morning for Osceola, Mo., where he has business in court.

D. R. Eversole & Son

The Following Merchandis is Worth Your Consideration at This Time.

Choice of any garment we have in our stock this week at a reduction of ONE FOURTH OFF regular price. This does not include our Amifrench lingerie.

Ladies Hose Reduced

Ladies 50c light weight Lisle Hose, colors white, black and tan reduced to **35c** a pair or three pairs for **\$1.00**.

Ladies Sleeveless Vests

Made from a fine quality lisle thread, size 36, value 50c---while they last we will sell three for **\$1.00** or **35c each**.

TO RENEW STRAWBERRY BEDS.

Cultivation and rejuvenation of Old Fields Should Begin at Once.

The work of renewing and cultivating old strawberry beds should begin immediately after the crop is harvested, according to Prof. F. W. Faurot of the Missouri college of agriculture. The rows may be "barred off" to a desirable width by running a furrow along either side with a turning plow or the rows may be narrowed by plowing out one side only. In either case the ground is leveled and worked down by harrowing and cultivating.

Many growers prefer not to use a plow but to work out the middles between the rows with double shovels or other cultivators. An orchard disk, with the sections extended just enough to leave a row of proper width, has proven to be a very desirable implement for working out strawberry fields.

Perhaps the most generally satisfactory method of renewal of rows is to "bar off" on one side with a plow, turning out about half the old row. This plan will greatly increase the number of new plants that will stand in the row the following season above the number that will stand if the rows are "barred off" on both sides.

Plowing on one side leaves a row much less exposed to injury from possible dry weather later in the season. It also makes it possible, when desired, to maintain the field in a profitable productive condition for a longer time.

The rows should be worked out with hoes and the runners trained in until a desirable stand is obtained. A reasonably wide row with the plants about five or six inches apart gives very satisfactory results in point of size, quantity and color of the berries.

Cultivation should be sufficient to keep the ground free from weeds and in good tilth throughout the season.

How the Flow of a River is Measured.

If you see a man leaning over the railing of a bridge intently watching the river, with a telephone receiver at his ear do not think that the man is trying to talk to the fishes or to a diver below the surface. He is probably one of the government's engineers measuring the amount of water passing under the bridge. This is done by lowering an instrument known as a current meter, into the water at several points under the bridge to determine the speed of the water and by measuring the depths of the water at the same points. From such information the flow of the river at that particular time and height can be computed, and when such measurements have been made at a number of different heights the flow of the stream at any height can be determined. Then if a record of the flow of the river is obtained each day from a river gage, the flow for each day can be computed.

LOOK OUT FOR THE LOCUSTS

Cicada Due to Appear This Month—To Heal Wounded Trees.

The cicada, commonly known as the 17-year locust, is expected to appear in June this year in scattered localities covering much of the northern and central states lying between the Hudson and Mississippi rivers, extending along the Appalachian elevated plateau into northern Georgia and South Carolina. This particular brood made its last appearance in this territory in 1898.

The 17-year locust covers in its range nearly all of the United States from the Mississippi valley eastward. The curious features of its regular periodic appearances and its long subterranean life give it perhaps the greatest popular interest which attaches to any insect on this continent, and lead to many inquiries with every reappearance of any important brood.

There are two races of this insect: the 17-year race, which occurs in seventeen different broods over the northern and central United States, and the 13-year race, which occurs in different broods throughout the Southern States from Texas eastward.

When any of these broods are characterized by great swarms they naturally cause fears for the safety of trees. The actual damage, however, is slight and is accomplished by the female cicada when she cuts the bark of the tree in the deposition of her eggs.

While the expected brood is not an important one, it covers a much wider territory than any of the other 17-year broods. According to the records, the number of locusts to be expected over most of this territory is not great, except in the Northwest and in the South east.

A careful canvass of the whole cicada area was made by the Bureau of Entomology with the assistance of the state entomologists in 1898. These reports, if they may be relied upon, extend the range of the periodical cicada in Wisconsin and Michigan much farther north than any of the old records.

The localities assigned to this brood in North Carolina, South Carolina, and Georgia, are, in the main, in counties in the elevated mountainous district, and the correctness of the reference to this brood is established by earlier records as well as indicated by the elevation.

Ordinary repellent substances, such as kerosene emulsion or carbolic acid solutions, seem to have very little effect in preventing the oviposition of these insects. Some recent experience, however, indicates that trees thoroughly sprayed with Bordeaux mixture or a lime wash are apt to be avoided by the cicada, especially if there are other trees or woods in the neighborhood on

which they can oviposit.

The most reliable means of protecting nurseries and young orchards is by collecting the insects in bags or umbrellas from the trees in early morning or late evening, when they are somewhat torpid. Such collections should be undertaken at the first appearance of the cicada and repeated each day.

Vigorous young trees often recover in three or four years from the effects of a loss of, or injury to, a considerable percentage of their branches. However, it is difficult to overcome the unsymmetrical appearance which will commonly result from the indiscriminate pruning often necessary as a result of the female insects' work.

The worst affected branches should be removed. The less injured limbs may be coated on the wounded parts with grafting wax or moderately hard soap. These protective coverings should be renewed at least once a year, preferably in the spring, until the wounds are entirely healed over.

It may be expedient, in the case of a badly wounded recently budded or grafted tree, to cut it back nearly to the bud or graft, so that an entirely new top may be made.

In the case of older trees, the main object of treatment is to secure the rapid healing of the wounds and prevent their being used as points of secondary infection by other insects. The worst injured limbs in such trees should also be cut out, so that all the vigor of the plant may be directed to the remaining wood. The healing process may be accelerated by thorough cultivation and the use of fertilizers on the land about the trees attacked.

The scientists of the Bureau of Entomology are keeping close watch of the territory where the locusts are due to appear, with a view to minimizing the damage.

10,000 CONSUMPTIVES DIE

Federal Research Shows That Many Annually Succumb in West—Endangers Traveling Public.

That 10,000 consumptives annually go west to die is the statement made by the United States Public Health Service, as the result of investigations recently completed. The tuberculous population of Western Texas and New Mexico is estimated to exceed 50,000, and from 20 per cent to 80 per cent of the families have some member who is or was infected.

The consumptive population which has migrated from other states is more than 2,000 at Albuquerque, above 3,000 at El Paso, and 3,500 at San Antonio. The effects of the transportation of thousands of consumptives to and from the resort cities upon the health of fellow travelers, the dangers arising to the communities themselves from the influx of invalids, and the social and economic results, are the subject of a broad and interesting study.

The percentage of deaths from tuberculosis within a short period of arrival is lessening. This indicates that the educational propaganda to keep far advanced cases at home has been of benefit.

Dust, confinement, altitude, and parting from friends, are declared to be often detrimental to patients, especially those in the later stages of the disease. Cases of this nature should invariably be guided by professional advice. Accompaniment by friends where ever possible is urged.

The Public Health service warns all prospective health seekers of the difficulties they are bound to encounter, and advises all who are not sufficiently provided with funds to remain at home. No invalid should venture forth unless he has sufficient money to last at least six months. The chances of recovery are greatly lessened when poverty exists.

Whether the coming of thousands of consumptives into the arid region has been of benefit to that section is hardly considered a debatable question. The growth of cities has been favored, industries developed, and production encouraged, by the invalid class.

Consumptives are engaged in practically every occupation, and the business and professional life of many cities is carried on in large part by them. The effects upon wages has probably not been entirely negligible.

Prof. and Mrs. Joe Dyson of Fayette, Mo., are visiting Mrs. Dyson's parents, Mr. and Mrs. E. B. Sheldon. They will perhaps remain in Maryville during the summer, Prof. Dyson working in the interest of Central college, with which he is connected.

Drowned When Canoe Tips.

Holland, Mich., June 22.—John Bazzard of Kansas City, eighteen years old, was drowned when his canoe tipped over in the breakwater at Holland harbor. His companion, Fred Hubbard, clung to the overturned boat until rescued by the life saving crew.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of
Importance to the Man Who Runs a Car

There is a grinding sound in the rear axle or gears of my car which I cannot locate. When the wheel turns halfway around it grinds, and the rest of the way it runs smoothly. Can you explain this trouble?

It is a good plan to look for the simplest troubles first. If the sound is a rasping or scraping one it is probably due to dragging brake bands, or the drums may be out of true. If the brake bands are dragging loosen them up slightly. Unless the drums are not badly out of round it will be sufficient to loosen up the bands, but if this will not answer the drums should be trued up in a lathe or else replaced. The grinding noise may be due to a shaft that is bent, and it is more probable that an axle shaft instead of a transmission shaft would give trouble in this way. The bending of a shaft will cause any gear on it to alternately mesh too loosely and too tightly with its mating gear. This will cause a grinding sound. Whether this is the trouble can only be determined by inspection. The straightening of the shaft should be left to some man who has had experience, and probably you could not do it anyway because of lack of equipment.

Another possibility is that one of the roller bearings is causing the trouble. One of the rollers may be broken, although this is not very likely, or the roller race may be worn out of round.

I would like to replace my five passenger body with a seven. Will the extra overhang on the rear axle hurt the motor?

The extra load will not harm the motor if it is not allowed to labor on high gear. When it is evident that the car cannot climb a certain hill on high gear, rather than force it up, a shift to second should be made. The same applies when running on second gear and low gear is required. There is more danger of hurting the springs or wearing out the tires. Possibly it will be necessary to substitute stiffer springs. Unless the tires are amply large for the weight they are now carrying, oversizes should be put on, at least on the rear, where the greater load is.

Can you tell me of a solution to clean out a radiator which expels water that is very dark brown in color when emptying the radiator?

Dark brown water in a radiator is due to the suspension in the water of particles of dirt or rust. There is no necessity of applying a solution to the radiator that will dissolve these particles because they can be very easily removed by flushing the radiator with large quantities of water.

I have four dry cells located in the tool box of my machine which are used for starting the motor. They will last only about three weeks, whereas one set should last the whole season. There is no short circuit, and the connections seem to be all right. Can you tell me the trouble?

One possible cause is that the cells you are using are defective, or it may be that the coil is out of adjustment. You do not state the type of coil that you have, but if it is that vibrator design it is quite possible that your high battery consumption is due to the tremblers being out of adjustment. If you have this type of coil try cleaning the contact points of the tremblers, and then adjust each trembler until it is working well and produces a good spark at the plug.

The most likely cause of your difficulty is that you are using too few dry cells. It would be much better to connect up five or six in series, as the voltage generated by four is not enough to do the work.

The slips covering the cushions and top of my car, which is almost a new one, have become black and have grease spots on them. Can you tell me what will clean and remove the spots?

Chloroform will be found quite satisfactory for taking the grease spots out of your cushions and top, although it will not clean out any dust or dirt that has settled on them. In cleaning the cushions and top it is well to first brush the dust out thoroughly, then remove grease by the use of chloroform and finally wash thoroughly with castile soap and lukewarm water. Gasoline has often been suggested as a good cleaning fluid for such purposes, but gasoline is a solvent for rubber, and the material that tops and cushions are made of often contains a rubber compound that is injured by the use of gasoline.

What are the objections to a two cycle motor?

The objections to the two cycle motor are that it is difficult to throttle down, it is uneconomical and is not adaptable to high speeds as the four cycle.

Will one new patent piston ring in each cylinder give good results with the old rings of the ordinary type? If so, what groove should I put them in?

One new patent ring will improve the running of your motor, but naturally three such rings will be more effective. If you use only one ring it should be put into the top groove.

Recently I had the carbon removed from my cylinders, but even after that when running about fifteen miles per hour on top gear when I want to pick up quickly with my spark retarded below halfway the motor knocks very hard. What is the cause?

The fact that your motor knocks when the spark is halfway advanced when you are accelerating from a speed of fifteen miles an hour on high gear does not indicate that there is anything wrong with your motor. Try retarding the spark further under these conditions and see if the car does not run all right. The idea to keep in mind when using the spark lever is to set it at the point just below that at which the motor will knock under the particular conditions that the motor is operating under at any given time.

My crank case holds three gallons and three quarts of oil when up to the pet cock lever, and I have a dash sight feed which shows a steady stream when I have the oil at the right level, but when I have the amount of oil I speak of the motor smokes. How can I stop it smoking and still know that I have enough oil to lubricate the motor?

The manufacturer of this motor should have set the oil level at the correct height. Therefore we would not advise doing anything to change the height of the oil in the crank case until you have made sure that the trouble is not elsewhere. Smoking may be due to loose fitting piston rings, worn pistons or worn cylinders or all of these combined. Poor oil might also be causing the motor to smoke, or it may be that the cooling system is not working properly, with the result that a large quantity of the oil is consumed because the motor runs hot. If smoking does not seem to be caused by any of these conditions it might be well to reduce the level of oil in the crank case, but before taking such a step you should confer with the manufacturer of the car or with some good repair man.

My motor stops when throttle is placed in certain notch on quadrant. When running slow around corners or over crossings and on speeding up, when the throttle reaches a certain notch on the steering gear quadrant, the motor either stops or jerks about six or ten yards. What is the cause of this?

Probably with the throttle in a certain position some part of the throttle mechanism short circuits the ignition current. With the car running move the throttle lever until the motor starts to miss or stop; then stop the car and look for the trouble. It is also possible that the movement of the throttle interferes with the operation of the carburetor. See that the air valve is not affected. If the throttle and the auxiliary air valve are connected up, or if the throttle in any way controls the flow of gasoline from the jet or jets, this mechanism should be carefully inspected.

I have trouble with my car losing power and speed. On grades that should be made on high I have to go in second. At times when going up grades on second the car checks up as if the brakes had been applied. Then again it will gain speed; then slow up as before. What is the cause?

The peculiar action of your car is due to temporary disarrangement of some part of the ignition or carburetion systems. If the former is at fault the trouble must be caused either by a short circuit or a loose connection. Inspect the wiring thoroughly for defective insulation at which points the bare wires may be grounded on the metal parts of the car, thus deflecting the current from its regular path. Go over all connections and tighten up any that are loose. After doing this the motor should run all right if the trouble is with the ignition. If the carburetion system is causing your motor to run irregularly you must be getting an improper mixture at times. If the mixture is too rich black smoke will be seen at the exhaust, and if this is the case the trouble is probably caused by dirt under the float valve, or there is a small possibility that it is due to a sticking of the auxiliary air valve. This valve may remain closed temporarily so that too rich a mixture is delivered to the motor for a time. On the other hand, if the mixture is too lean, trouble may be the result of any of the following causes: The auxiliary air valve may stick open, thus allowing too much air to be delivered to the motor; the float may stick so that an insufficient supply of gasoline is the result. Too small a quantity of gasoline might also be the result of dirt in the spray nozzle or possibly in the feed pipe from the gasoline tank.

Will you please tell me how to prevent the throwing of oil from my valve tappet guides?

The leakage of oil out of valve tappet guides is due to the wearing away of the guides, so that there is more or less space between it and the tappet. When this condition exists the motion of the tappet carries the oil up from the crank case and allows it to flow out over the upper end of the guide. The only remedy is to fit new guides.

Deafness

Are You Deaf or Hard of Hearing?

Now is the ideal time to treat deafness. Ninety per cent of all deafness is caused by catarrh. Dr. Edwards of St. Louis has discovered and perfected an operation for catarrhal deafness which is remarkable for its many cures. There is no cutting and it is painless. I am now using this operation in Maryville with remarkable success. Every patient treated by me has been cured or greatly benefited.

NO. 16.

HORSE PLUNGES BOY INTO FLOOD

FAY HENSON, NEAR RAVENWOOD,
SAVED FROM 102 BY BOAT.

NODAWAY, 102, DOWN; PLATTE STILL RISING

Overflow DANGER Transferred to East
Side of County—Continues to Rise
to Near Earlier Mark.

The flood situation of Nodaway county was transferred from the west to the east side of the county this morning, when the Nodaway river began falling steadily and the Platte continued to rise up to the height reached early this spring, when much damage was done. The 102 river is falling this afternoon at Hopkins, Pickering and east of Maryville, but awful slowly and much low land is still under water here.

An accident which came near resulting in the drowning of a young man, occurred near the municipal water plant at 10:30 o'clock last night, when Fay Henson, son of Charles Henson, four miles west of Ravenwood, was plunged into deep water between the two bridges on the state road, when his horse became scared at the raging flood.

Save Youth by Boat.

Henson jumped from the horse and clung to some willows at the south side of the road at that place until Marion Gard and Hugh Coffelt, his two companions, also on horseback, went to his rescue with a boat, borrowed at the city plant. He was carried back to shallow water and escaped with merely a bad scare. The horse had in the meantime swam to safety.

Pickering reports that the 102 river there is almost within its banks, and that the bridge across the river north of town can be crossed. The bridge east of town is still partially under water, however. The fall there began last night and continued slowly all morning.

Hopkins also reports a slow fall and that the flood waters are nearly all off the lowlands.

Falls Slowly here.

Bert Hillsabeck, engineer at the city water plant here, reported at 1:30 o'clock this afternoon that the river had receded scarcely five inches since daylight this morning, and that the state road there was still under water from a foot to two feet. It still comes up to the hub of a wagon or buggy.

The overflow is deepest between the wood bridge over the new channel and the steel bridge over the main channel of the river, and also directly east of the main bridge.

The river was still on the rise at Arkoe and Barnard at noon today. Both places reported the lowlands to be partly inundated and that the rise was quite rapid.

The Nodaway river was falling all along its channel in Nodaway county this afternoon. Clearmont reported the stream to be considerably below bank full and still falling. Burlington Junction reported the river to be within its banks and that the fall began late last night.

Use Boats at Skidmore. Skidmore and Quitman reported a slow receding of the flood waters, but that the stream was still out of its banks. The bridge at Skidmore can be crossed in vehicles yet, but boats are

being used instead to cross the bottom to the other side of the river.

Quitman sends the report that the river there is falling but is still considerably over the lowlands. The road through the bottom can be crossed there, however, but not with automobiles.

Parnell and Ravenwood reported a steady rise in the Platte river this morning and early this afternoon. The river at Ravenwood is over its banks and flooding much low land in the bottom. The river bridge across the stream north of town cannot yet be crossed, but the state road bridge is being used slightly.

The river is also rising at Conception Junction and Guilford, and is flooding the real low lands. Conception Junction reports the river to be easily as high as early this spring. The river roads there are impassable and bridges are inundated.

A fall is expected to begin in the upper waters of the Platte river late this afternoon or tonight, however, unless further rains fall there.

BURNED WHILE KILLING LICE

Mrs. Rollie Blaine, Clearmont, Saturated
Shoes With Gasoline in
"Scorching" Poultry Pest.

Mrs. Rollie Blaine of Clearmont was severely burned on both feet and lower part of the legs shortly before noon today when gasoline on her shoes caught fire. She was cleaning the poultry house and saturated her shoes with gasoline to prevent the mites from crawling upon her. She then lit a torch to burn the mites from the sides and roosts of the house.

Mrs. Blaine accidentally placed the torch too near her shoes, causing the gasoline to ignite. Before she could quench the flames her feet and legs were seriously burned. She was saved from further injury by the prompt assistance of Mr. Blaine, who had heard her screams.

TO ATTEND MUSIC MEETING.

Prof. P. O. Landon, State Examiner, to
St. Joseph Convention—Others
Go Tomorrow.

Prof. P. O. Landon of the Conservatory of Music will leave this afternoon for St. Joseph to attend the twentieth annual convention of the Missouri Music Teachers' association, in session there June 22 to 25, inclusive. Prof. Landon is general examiner for the state association. He also will participate in a public school music conference there Thursday.

Miss Alice Porter, Miss Eleanor Smith and Miss Bernice Rice, members of the Conservatory faculty, will leave tomorrow morning for St. Joseph to attend the convention. Several other music lovers of Maryville also are planning to attend this week.

IS POULTRY CLUB OFFICER.

A. L. Glass, Hopkins, a Township Vice
President, Plans Township
Contest.

A. L. Glass of Hopkins, was appointed vice president yesterday of the Northwest Missouri Poultry association for Hopkins township, J. H. Saylor, secretary, announces. Mr. Glass intends to try to get up an individual township poultry exhibit and contest in the annual show here next fall, as has been urged by the association.

It is believed that many townships of the county will accept this township plan and offer prizes to the persons from that township who exhibit fine fowls.

Only two township vice presidents have been named yet. The other is Mrs. W. P. Nicholas of Burlington Junction for Nodaway township.

MAY LET CONTRACT

COUNCIL MEETS TONIGHT TO CON-
SIDER PAVING AGAIN.

ITS UP TO BIDDER NOW

City Accepts Proposal of St. Joseph
Firm, Which is Expected to Ap-
prove or Reject Proposition.

The formal awarding of a contract to pave nineteen blocks in the city this summer for \$35,851.25 to Young Brothers Construction Company, St. Joseph, will be considered at a meeting of the city council tonight, if the bidder accepts the provisions of the contract. Little other business is expected to come up at the special conference tonight.

The bid of the Young Brothers was the only one submitted in the third call made by the council for last Friday night. The bid was thereupon accepted and a resolution adopted to that effect. It is now up to the bidders to accept the provisions of the city's contract, before its signing tonight.

If the contract is signed tonight, it provides that paving operations must be begun within thirty days and that the paving must be completed within ninety days thereafter. It also provides that the paving shall be kept repaired and retained in good condition for five years.

The paving will be on six streets of the city. It is the first paving successfully considered by the city for several years.

SAY HE ASSAULTED BOARDER

Charles Childress Arrested on State
Warrant for Battery of Estes
Wyatt—Trial Tomorrow.

Charles Childress, living west of the Wabash freight depot, on North Dunn street, was arraigned in Justice R. L. McDougal's court this morning on a state charge of assault and battery on a boarder, Estes Wyatt, last Sunday. Childress pleaded not guilty. He was released on \$200 bond this morning pending his preliminary hearing in justice court tomorrow.

Childress was arrested at 6 o'clock last night by Deputy Sheriff Dee Callahan and Chief of Police E. C. Morberly. He is said to have been drunk at the time of the alleged assault.

BASE BALL TEAM UNNAMED.

Prize for Appropriate Title for Week-
Day Players, Not Accepted.

The Maryville week-day base ball team still remains without a name, even though two season tickets were offered for the most appropriate and "fetching" title for it. The contest, announced last week, closed at 6 o'clock last night with not a single contribution of names. Fred Robinson, chairman of the executive committee announced.

The management of the team will probably select a name for the team soon, and thereby save the two season tickets anyway.

2 SOWS FARROWED 665 PIGS.

S. J. Icke, Near Barnard, Says One
Raised 326 in 14 Years—Loses
Only 9—Lost Only 13.

S. J. Icke, living eleven miles south of Maryville, near Barnard, has some prolific Duroc-Jersey sows. According to Mr. Icke he has one that has farrowed twenty-four pigs each year for fourteen years and has lost only nine of the entire 336 pigs farrowed. Another sow, he says, has farrowed 329 pigs in fifteen years, of which all were raised but four.

Mr. Icke also has four gilts that raised ten pigs each, all being farrowed last Saturday.

Visits Parents Here.

Mrs. Charles Lippman and son Cyrus of St. Louis are visiting Mrs. Lippman's parents, Mr. and Mrs. C. A. Anthony, this week.

Mr. and Mrs. Warren Jones returned Monday from a visit at Quitman since last Wednesday. Mr. Jones tried his hand at fishing in the Nodaway river, but reports that he was not very successful.

HOLD TRI-CLUB GUN SHOOT

Maitland, Skidmore and Maryville Gun
Artists in Contest at Skid-
more Today.

A gun club shoot between members of the Maitland, Skidmore and Maryville gun clubs is being held on the grounds south of Skidmore this afternoon, with about thirty men contesting. Among those representing the Maryville club are W. H. Tindall, Conrad Sweetzer, Dr. D. J. Thomas, Ben Chandler, Brint Embree, R. I. Souers and Bruce Johnson.

The Skidmore club of twenty-seven members will be represented by between fifteen and twenty marksmen, while Maitland sent a delegation of about a half dozen. Some fine scores are expected.

CALL OUT MILITIA

GEORGIA EXECUTIVE CALLS THE
GUARDSMEN TO SAVE SELF.

MOB ATTACKS SOLDIERS

Crowds Infuriated Over Commutation
of Leo M. Frank's Sentence Seek
Vengeance on Governor Slaton.

Atlanta, Ga., June 22.—With several hundred men and boys clamoring to get into the front gates of his country home on Peachtree road, which had been barricaded with barbed wire entanglements, and threatening to overpower twenty country policemen, armed with riot guns, Governor Slaton called out the militia for protection.

Upon the arrival of four companies of state guardsmen, which had been held under arms and rushed to the estate in automobiles, the governor proclaimed martial law in a district extending half a mile in front of his home, half a mile back and for a distance of about a quarter of a mile on either side.

When the soldiers lined up with fixed bayonets to disperse the crowd, stones, bricks and bottles were thrown at them. Atlanta, Ga., June 22.—More than 2,000 persons gathered in a mass meeting in the capitol grounds and passed a resolution condemning Governor Slaton's action in commuting Leo M. Frank's sentence to life imprisonment.

The crowd then marched to "Five Points," in the business center of Atlanta, and after a short halt went to the city hall. There several arrests were made after mounted police and patrolmen had made futile efforts to disperse the demonstrators.

Mounted police succeeded in keeping the crowd separated somewhat by riding in rings, rounding up the demonstrators into small detachments.

The governor's decision was announced barely twenty-four hours before the time set for Frank's execution for the murder of Mary Phagan, and after he had been taken secretly from the Fulton county jail to the state prison farm at Milledgeville.

At the mass meeting in the capitol grounds a speaker admonished everyone present to march to "Five Points" as a demonstration against the governor's action.

Governor Slaton issued a statement saying that he knew his action in commuting Frank's sentence means his retirement from public life, but that he felt that he would be a murderer if he allowed Frank to hang.

Governor Slaton Hanged in Effigy.

Marietta, Ga., June 22.—Governor Slaton, who commuted the sentence of Leo M. Frank, was hanged in effigy here. A life size dummy, strung to a telegraph pole, bore an inscription, "John M. Slaton, Georgia's Traitor Governor." Mary Phagan, the victim of the pencil factory murderer, formerly resided here.

WILL ADMINISTER ESTATES.

Name Guardians for Property of James
Hammond and John R. Hayes.

Administrators for two estates were announced this morning by Miss Mabel Hunt, deputy in probate court. Edward L. Hammond will be administrator for the estate of his father, James Hammond, who died in Maryville, June 14.

Lawrence M. Hayes will be administrator of the estate of his brother, John R. Hayes, who died at his home here May 27.

The Mt. Airy church ice cream and strawberry social has been postponed indefinitely, on account of overflow of the 102 river.

SICAL THURSDAY NIGHT.

ANNOUNCE PROGRAM

Ernest L. Cox to Give Vocal Numbers,
Miss Carrie Margaret Baker and
Mrs. E. F. Wolfert Instrumental.

The program for the recital to be given in the auditorium of the First Methodist church Thursday night by Ernest L. Cox of Kansas City and Miss Carrie Margaret Baker and Mrs. E. F. Wolfert of Maryville, was announced today by the Rev. G. S. Cox, brother to Ernest L. Cox. Olin M. Cox of Kansas City, another brother to the local pastor, will be accompanist to Ernest L. Cox.

Miss Baker will start the recital with an instrumental number from Chopin. Mr. Cox will then give three vocal numbers and an encore, after which Miss Baker and Mrs. Wolfert will give an instrumental duet. All of Miss Baker's numbers will be instrumental. Mr. Cox will entertain entirely with vocal numbers.

The recital was to have been held Friday night, but on account of other entertainments in the city that night, it was set ahead one day. The musical will be free to anyone, Mr. Cox announces. The recital was planned because of a visit the brothers planned here the latter part of this week, to the Rev. Mr. Cox.

Here Is The Program.

The program for the recital follows:
Scherzo, B flat Minor, Chopin—Miss Baker.

a. Sword of Teresia, Bullard.
b. Ich Waulde Unter Blumen, Meyer-Helmond.

c. Morning's Lullaby, Jamison.
Encore, Irish Courtship.

Ernest L. Cox.
Grande Polonaise Brillante, Chopin—Miss Baker and Mrs. Wolfert.

a. Kings of the Road, Bevan.
b. Wo! Hahn.

c. The Day is Done, Spross.
Encore, Irish Names.

Mr. Cox.
a. Soaring, Schumann.

b. Bird as Prophet, Schumann.
c. Etude, C sharp minor, Schumann—Miss Baker.

a. Memories, Downing.
b. I Know of Two Bright Eyes, Clutsain.

c. My Little Love, Hawley.
Encore, Sweet Miss Mary.

Mr. Cox.

NO MORE OVERDRAFTS.

All the Banks Will Cut Out Practice,
As It Is Illegal and Unauthor-
ized Business.

The state banks and trust companies in Maryville received notice this week from the state banking department, J. T. Mitchell commissioner, to keep out overdrafts. Mr. Mitchell, in writing, says:

"The comptroller of currency is making a special effort to keep out overdrafts in national banks. Probably from the fact that competition is responsible for much of this practice, he has asked the different state banking departments to co-operate in this direction. This seems an opportune time to correct this growing evil.

"My views on overdrafts are generally known to banks and trust companies in this state. I have tried to impress upon them that large overdrafts are a reflection on the management of the institution, as it indicates a looseness of business methods that should not prevail."

The Maryville banks will take steps to keep out overdrafts.

The First National bank was notified by the comptroller of currency at Washington some weeks ago about overdrafts and promptly took action against the practice.

Gets Assessment Books.

E. D. French of Skidmore, assessor for Monroe township, came to Maryville today in company with Elmer Howden to get the assessment books for this year's assessments. He will begin the assessment about July 1.

A marriage license was issued in St. Joseph yesterday to Alex C. Waldier of Parnell and Miss Margaret E. Collins of Maryville.

MAITLAND REPLACES HOPKINS

Base Ball Team Held Up by Floods, so
Holt County Players Come To-
day for Game.

The Hopkins base ball team was unable to come to Maryville today on account of high waters, so the Maitland team will play the week-day team of Maryville on the Normal athletic grounds at 4 o'clock this afternoon instead. The Maitland team is said to be fairly strong and capable of showing the local players a good tussle for the victory.

Wakeman will pitch for Maryville, while Lawrence Keeler, who has been attending St. Mary's college, St. Mary's Kan., will replace Walter Wray on third base. Wray will supplant Mastellar at the initial sack, as Mastellar will not appear in the game today.

\$611 TO OBSERVE FREEDOM

Negroes Canvass for Fund to Celebrate
Emancipation Day Here August 4
—Is an Old Custom.

The celebration of the emancipation of the negroes of the West Indies on August 4, 1834, which the negroes all over the country observe, will cost the negroes of Maryville this year \$611.25, according to an estimate announced today by the committee which is soliciting funds. It seems like a large amount, but when it is learned that the leaders lost last year, with nearly as large a fund to draw from, the aspect is changed somewhat.

The negroes here have celebrated the day for over thirty years.

The soliciting committee consists of Oliver Vance, chairman; James Palmer and Arthur Smith. They began the canvass yesterday, and so far have done fairly well. The celebration will be held Wednesday, August 4, either in the Franklin school park, North Main street, or in the fair grounds, East First street.

Too Cold January 1.

It is generally believed that the negroes of America celebrate their own freedom, but such is declared to be untrue. It is in reality the observance of the emancipation of the negroes of the West Indies by the British, when 700,000 slaves were set free.

The emancipation of the negroes of the United States was declared September 22, 1862, and became effective January 1, 1863. Clarence Baker, a negro leader of Maryville, this morning said, however, the celebrations were held in August, because it would be too cold to make such observance on the real emancipation day, January 1.

Here's How Money Goes.

The expenses for the celebration this year, as estimated by Vance, follow:
Band from Omaha.....\$270.00
Speaker.....21.90
Speaker.....19.35
Advertising.....60.00
Attractions.....150.00
Platform.....18.00
Seats.....10.00
Dray.....4.00
Ice.....2.00
Reading.....2.00
Cabs and bus.....12.00
Hunting.....7.00
Special from St. Joseph.....35.00
Total.....\$611.25

DEMENTED SON IS DROWNED?

M. H. Pearson Hears Scion, Who Es-
caped from State Home, Meets
Death in Ohio River.

M. H. Pearson received a telegram last night from R. P. C. Wilson, superintendent of the home for feeble minded at Marshall, that his son, Albert Pearson, who escaped from there about a week ago, had been drowned in the Ohio river near Henderson, Ky., according to word received from that place by Mr. Wilson.

The telegram says that the description of the young man tallied with that of Pearson, and that further particulars would be sent in a day or two.

RUST IN GRAIN; FIELDS TOO WET

FARMERS FEAR ABILITY TO GET
BINDERS IN FIELD.

POTATOES ROTTING IN DAMP BOTTOM GROUND

Decay of "Murphy" Reported in Low-
lands—Oats Fine—Heavy Rye
and Wheat Down.

With the wheat and rye harvest approaching closely, farmers of Nodaway county are puzzled as to the ability to harvest the crop when it really does ripen, on account of the continued rains of the last few weeks. Not only that but the continued damp weather and overcast skies have rusted some fields of wheat badly, it is reported.

Some of the heavier fields have been packed down by the wind and rain. Farmers say it will be hard to operate a binder in some fields if it rains any more before harvest.

The rye is expected to be ready to harvest about the middle of next week, while wheat will be ripe about July 1, it is generally reported. Some will ripen slightly earlier perhaps. Oats are doing fine so far and the rain has come too early to rust it. This crop will probably be ripe about July 1.

Potatoes Are Rotting.

The corn crop is now looking fine and most of the farmers have made the second plowing. It stands on an average of knee high, though some is higher. Some fields have gotten very weedy and grassy on account of the continued wet weather.

James Hostutter, thirteen miles northwest of Maryville, in the city today, said much rust was evident in the wheat and rye fields, though no black rust had been observed in his neighborhood yet. All is of the "red" variety, which is not particularly damaging to the wheat grains, except to shrivel them slightly.

Some farmers along the river bottoms complain that the wet weather has caused many potatoes to rot or decay.

DRUGGIST LIBELED; \$751

Richard A. Walker, Skidmore, Dam-
aged by Dr. Frank A. Lee, St. Jo-
seph Jury Finds—Hurt Credit.

Richard A. Walker, a Skidmore druggist, was awarded \$750 punitive and \$1 actual damage by a jury in circuit court at St. Joseph, at 10:30 o'clock this morning, against Dr. Frank A. Lee, a former resident of this county, for libel. The jury deliberated an hour and a half. The case was heard yesterday, G. R. Ellison and W. A. Blagg of this city being counsel for Walker.

Dr. Lee is said to have written a letter to a St. Joseph drug firm, injuring the credit of Walker. Lee denied authorship of the letter in the hearing yesterday. Dr. Lee formerly practiced medicine at Quitman, later in Skidmore, and recently went to California.

Prof. and Mrs. J. W. Dyson of Fayette arrived Sunday night to be the guests of Mrs. Dyson's parents, Mr. and Mrs. E. B. Sheldon.

Mrs. A. D. Arnett has returned from Pawnee, Okla., where she has been visiting her mother, Mrs. W. H. Whitaker, for two weeks.

Northwest Missouri captured a number of agricultural prizes at the Panama-Pacific exposition.

The indications now are that the income tax returns for this year will amount to more than \$83,000,000, which will reduce the treasury deficit to comparatively insignificant proportions. So the enemy will have to abandon this and charge on the administration from some other direction.

Kansas has one Democratic United States senator and six Democratic members of congress. The Republicans are claiming that they will be able to capture the whole bunch because the Democrats have allowed themselves to become divided over national prohibition and other questions. Democrats in other states would do well to take note and sit steady in the boat if they desire success next year.

A negro "trusty" at the Joliet, Ill., penitentiary is supposed to have attacked and murdered the beautiful wife of the warden during his absence Sunday. The warden had adopted an "honor system" by which a number of prisoners with good records had been allowed unusual latitude and were made house servants. Reports say that this man had access to the bedroom of the warden and his wife at all hours to wait upon them, that he was wont to bring her the morning paper at 5:30 in the morning, to bring her water, take her pet dog for an airing, etc. Just why a woman would place herself at the mercy of criminals who have been for years in restraint is past understanding, and indicates that the warden himself lacked common ordinary horse sense.

In the early spring Russia won a great victory over the Austrians and Germans and forced them across Galicia and over the Carpathian mountains. Germany kept her big gun factories going day and night until she was good and ready, and started in again. She caught Russia short of big guns and ammunition and has administered to her enemy a terrible licking in return. Russia still has an abundance of men and they are desperate fighters, but they can't stand before the tremendous guns brought to bear upon them. Russia is hemmed in so that she must get supplies mainly through her Asiatic seaports at a great distance and with inadequate railroad service. Russia can give some expert testimony on the difference between unpreparedness and being prepared. Likewise can Great Britain and France.

Returns to Shelbyville.

Mrs. Vernon L. Drain left Monday afternoon for her home in Shelbyville, after a visit with her mother, Mrs. Martha E. Turner, and her sister, Mrs. Augustus Romasser.

COBURN PLAYERS NEXT WEEK

To Appear at the Normal Next Monday and Tuesday—To Give Three Good Dramas.

The Coburn Players, who will appear at the State Normal school on next Monday and Tuesday, and will present Hazelton & Benrimo's wonderful play, "The Yellow Jacket," on Monday evening, and Moliere's "The Imaginary Sick Man," at Tuesday's matinee, and "A Midsummer Night's Dream" at the evening performance Tuesday, will be well received here, as they appeared here last summer at the Normal and favorably impressed the crowds of students and the town people.

"The Yellow Jacket" is the famous play of the day, and the most extraordinary dramatic production of this or any other year. Five months it stayed at the Fulton theater, New York, and the last four weeks it turned away people at every performance. It is described as "a Chinese play done in a Chinese manner." This means nothing.

"WU SIN YIN" THE GREAT,
In "The Yellow Jacket."

ing to people who have never seen a Chinese play. The story might as well be American as Chinese. It would fit into the drama of any other country as well as it does into the theatricals of China and the United States. It is a story of a young man who, shortly after his birth, is deprived of his parents, is fostered by an honest farmer and his wife, finally falls in love with Plum Blossom and cannot marry her until he discovers who his ancestors were. "Ancestors" in a Chinese play are equivalent to fame and fortune in a drama of the western world.

Upon reaching the age of 20 he decides to go out and find out who were his ancestors, just as some other young man born and brought up in some other country would go out in search of his fortunes. The search takes him through adventures, trials and troubles not unlike those that are befalling young men in any other country today. The love of his mother, Chee Moo, which is constantly with him, and the love of little Plum Blossom, whose slipper he carries, added to his own integrity, bravery and love of honor, truthfulness and family, bring him through all these vicissitudes, cause him to find his ancestors and take him back to the girl of his heart. It is not an unusual story, but it is presented in an unusual way.

The costumes are wonderful old embroideries imported from China and worn by generations of Chinese actors. Some of them are over 400 years old.

Contrary to somewhat widespread opinion, the comedies of Moliere are not of the "high-brow" variety that holds an appeal only for the serious student of the classics and those deeply learned in the drama. This is especially true of "Le Malade Imaginaire" (The Imaginary Sick Man) which the Coburn Players will give.

It has been well said that Moliere is for all ages of men; for youth there is his comic invention, his drollery, his frank fun; for the older spectator there is appreciation of his insight into human motives and his marvelous skill in portraying them, and for everyone who takes an interest in the comedy of human endeavor there is to be found in Moliere what he needs. Mr. Coburn has given his customary care and personal attention to every phase of the production of this addition to his repertoire, and it will be presented by a company of artists especially chosen for their fitness for the many sprightly parts.

"A Midsummer Night's Dream" has been pronounced by many scholars the most difficult of Shakespeare's plays to produce adequately. In fact, more than one authority has gone a little too far ahead of his time in saying it was unactable, and it is with full realization of the difficulties to be overcome that Charles Douville Coburn has

MISSOURI SUFFERERS FIND GREAT REMEDY

Thousands needlessly suffer from stomach ailments, handicapped in their work and pleasure. The stomach is the mainspring of life and the body cannot run without it.

You want to be well quick. A great many people in Missouri and thousands all over the country have found the way to health by the use of Mayr's Wonderful Remedy. The first dose shows results. Here are the words of two Missourians:

Mrs. J. B. Trullinger of Norborne, Mo., wrote: "Words cannot express my appreciation of your medicine. I have felt fine all summer and fall. Am gaining weight."

W. T. Jennings, cashier of Bank of Bois D'Arc, Mr., writes: "Please send four more bottles of the stomach remedy. Both my wife and I use this medicine and think it truly wonderful."

Mayr's Wonderful Remedy gives permanent results for stomach, liver and intestinal ailments. Eat as much and whatever you like. No more distress after eating, pressure of gas in the stomach and around the heart. Get one bottle of your druggist now and try it on an absolute guarantee—if not satisfactory money will be returned.

waited so long before giving a version which he thinks worthy of what is expected of him as a producer. With a knowledge of his deep respect for tradition, coupled with his sympathy for modernity, it will be interesting to witness this blithe fairy play as the Coburn Players will present it.

TO PREVENT MEATS SOURING. Tells How Cured Hams May Be Kept Sweet in Damp Weather.

In explaining the need of care in keeping cured meats sweet in damp weather, P. F. Trowbridge of the department of agricultural chemistry says:

"It should be emphasized that mold does not spoil cured meats. Some persons in purchasing country cured hams insist that the mold shall be left on as a proof that the meat is genuine country cured. Some recommend dipping the meat in boiling hot water to stop the molding. This is only temporary, as the mold will start to grow again if the damp weather continues.

"In prolonged seasons of wet muggy weather cured meats are certain to mold. This molding of cured meat can be checked by hanging the meat where there is a good circulation of air. Cured meats should never be hung in a damp basement. If the smokehouse is tight enough to keep out the skipper fly so that the meat is left hanging in the smokehouse a smudge built every week during damp weather helps keep down the mold.

"Sacking of meats does not stop the molding. If meats are wrapped tight to keep out the skippers the wrapping should be done first with cloth and then with paper. If paper is used first it will stick badly to the meat after it molds. We find it a very good practice to encase the meat in a paper flour sack, tying the neck of the sack very tightly around the string by which the meat hangs. The meat is then hung so that the pieces do not touch each other. Molding is reduced to a minimum and the meat is protected from skippers."

In 1910 New York City had in its population 19.3 per cent of persons of native parentage, 38.2 per cent of persons of foreign or mixed parentage, 40.4 per cent foreign born, and 1.9 per cent negro. Manhattan Borough had 47.4 per cent foreign born. In New York state 30.2 per cent were foreign born.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running ear or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness caused by catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Expert Advice to Automobile Owners.

I have a leather faced cone clutch and wish to put on a new one. I want to know the best kind of leather I can get for the purpose; also how to put it on. Would asbestos be better than leather?

Either leather or an asbestos fabric may be used with satisfaction. If you use leather you should obtain friction leather, which is made for this purpose.

In ordering the facing, the diameters of the two pieces of the cone and the width of the cone should be given. If an asbestos fabric is used, care should be taken to obtain a piece that is made for the size of cone you have. Unlike leather, strips of this material to fit cannot be cut from a large piece of fabric. The thickness of the facing is important because too thick a facing will prevent the cone from properly entering the flywheel. One-quarter inch is an average value.

If you desire to buy a piece of leather and cut your own facing you should remove the old clutch leather and use it for a pattern. Before applying the leather it is well to soak it in a neat-foot oil to soften it. Care should be taken to cut the leather to the correct length. The best way is to first rivet one end and then wrap the leather around the cone in such a manner that it slips down over the smaller end of the cone. Then pull it tight and rivet the other end. Now push the leather up in place all around and it should be tight and unwrinkled.

The same advice applies to putting on an asbestos fabric, but there is less danger of the facing wrinkling.

Will you explain fully the method of fitting and lapping in new piston rings?

Place the cylinders on the bench and apply some ground glass and oil to the interior. The ground glass should be very fine. Then place the piston in the cylinder and work it in and out until the rings are well polished and fit tightly. Lapping is an operation which requires an experienced man. Furthermore, it is advisable to use an old cylinder whenever possible, as there is danger of wearing the new cylinder.

HERE'S HOW YOU TOOK COLD.

Kissing Distributes Germs and Causes Throat Troubles—So Quit It.

One who likes to observe fashions in human conduct cannot help concluding that kissing is no longer a universal feminine custom says the Youth's Companion. Women have learned to meet and part, at least in public places, with out open endearments, which is an excellent thing both as a matter of good taste and of hygiene.

Foolish customs often survive endless scolding on hygienic grounds, but they are usually vulnerable from the standpoint of social convention; and kissing is becoming unfashionable! If we could only bring promiscuous kissing under the ban for everyone, how many colds and coughs and minor infections we should be spared!

We cannot think of forbidding the kiss between parents and children, or between brothers and sisters, and yet everyone ought to exercise the greatest caution, especially during the winter months, when colds and gripes are prevalent, especially among families that are predisposed to such infections. Why do we calmly exchange the germs of a complaint that we sternly isolate after it has decimated itself?

Affection can be shown without the touching of lip to lip. No caress is more charming than the gentle touch of cheek to cheek that well bred Frenchwomen use; parents ought to teach little children to do all their kissing in that way. Even people who are in perfect health harbor microbes that can cause violent illness in those who are susceptible to them.

Certain germs, those of pneumonia, for instance, are very often present in the mouth and throat; they are, for the time being, harmless to their host, but might be fatal if communicated in a kiss to someone more susceptible to their poison.

Many persons continue the practice of kissing long after they have learned its dangers, because they fear to be misunderstood; but there are other and harmless ways of showing their affection. Select one of them and accustom those you love to that. You will find that they will soon regard the new caress quite as welcome as the kiss.

Various Measures of Stone.

Owing to the variety of uses to which stone is put, there is no regular unit of measurement employed by the quarrymen, the stone being sold by the cubic yard, cubic foot, ton, cord, perch, rod, square foot, square yard, square, etc. Building and monumental stone, especially the dressed product, is usually sold by the cubic foot or the cubic yard, although this unit varies with the class of stone and with the locality; a large quantity of rough stone is sold by the perch, cord, or ton.

Rubble, or riprap, including stone for such heavy masonry as breakwater and jetty work, are generally sold by the cord or ton. Fluxing stone and stone for chemical use—as for alkali works, sugar factories, car-

bonic-acid plants, and paper mills—are sold by the long ton. Flagstone and curbstone are sold by the square yard or the square foot, the thickness being variable and dependent on the orders received.

Granite paving blocks are sold invariably by number, but the blocks are not of uniform size, the value depending on the size of the block and the labor necessary to cut into the shape desired. Other paving material is sold by various units, such as ton or cubic yard.

Crushed stone is usually sold by the cubic yard or ton, the short ton being more generally used. The weight of a cubic yard of crushed stone varies from 2,300 to 3,000 pounds, the average weight being about 2,500 pounds. In certain localities crushed stone is sold by the "square" of 100 square feet by 1 foot, or 100 cubic feet. Crushed stone is also sold by the bushel, 21½ bushels representing a cubic yard of about 2,700 pounds.

FLOOD RESTRICTS SUPPLY

Kansas City Markets Advanced Cattle and Hog Prices as Result of Light Shipments.

Kansas City, June 21.—Corn-fed cattle advanced 15 to 30 cents last week, drawing away from the lower grades by just that much or more, bulk of the cattle selling steady for the week. Receipts today are 3,000 head, the supply being restricted by fears of high water, as well as crippled condition of some of the carriers. The threat of water damage has disappeared today, and clear skies remove all danger of flood. Packers are all buying, as the river has been stationary since morning, and will start falling today. The market was strong to 10c higher, some sales 15 cents up. Native offerings reached \$9.25, bulk of the natives \$8.15 to \$9.60.

A feature today was the sale of some prime fed steers from Canyon City, Texas, at \$9.10 and \$9.25, weighing 1,314 to 1,444 pounds average, highest price ever paid for Texas cattle on the open market. Another leading sale today was a train of 18 cars of steers from Phoenix, Ariz., fattened on ground barley, at \$7.85 to \$8.25, weighing around 1,200 pounds, including a load of bulls at \$6.65 and a load of stags at \$7.15.

These prices were very pleasing to the shippers, as was also the light shrink, the cattle taking a good fill here. Butcher grades remain firm, account of scarcity. Quarantine arrivals were delayed by washouts, although two or three trains got in late, for which buyers were waiting.

Stockers and feeders are in strong request, but supplies are limited, desirable cattle largely at \$7.25 to \$8.00, a few cattle above these prices.

In the hog division light receipts met a strong demand, and the 5,000 head that arrived sold 5c higher, most sales at \$7.55 to \$7.65, top \$7.70. The break in prices last week looked threatening.

TEUTONS CLOSING IN ON LEMBERG

Austro-German Forces Now Within Nine Miles of Goal.

MACKENZIE SEIZES RAILWAY.

Investment of City So Complete Russians Must Either Withdraw or Submit to a Siege—French Report Progress—Activity in Dardanelles.

London, June 22.—Rawa Ruska, according to a Berlin official report, is the latest Russian position in Galicia to fall into the hands of the Austro-Germans, and as the Teutons also are reported to be fighting east of this town, the investment of Lemberg must be so nearly complete that the Russians must either withdraw from the Galician capital or leave a portion of their forces there to be seized.

The German general, Von Mackenzie, is reported to have seized the railway connecting Rawa Ruska with Lemberg, thus cutting off the retreat northward of the Russians. According to the latest news from the Austrian headquarters the Teutonic allies are now within nine miles of the limits of Lemberg.

An official Turkish report indicates that there has been activity in the Dardanelles, with an allied battleship again battering away at the forts of Seddul Bahr.

In the west Paris continues to report French advances, especially in the region of Arras. Here, it is asserted, progress has been made in the direction of Souchez and the capture of several trenches has brought the attackers near the northwest of the village.

Commons Gives Cabinet Blank Check

The house of commons gave the British government a blank check to be filled up in accordance with the expenditures of the year.

In asking this indefinite credit Chancellor of the Exchequer McKenna announced that he proposed to issue a war loan, to be terminated at the option of the government between 1925 and 1945, for a sum, the only limit of which is to be the excess of the national expenditures for war and other services for the year over the revenue. This loan will be put out at par and will bear interest at the rate of 4 1/2 per cent. The facilities for subscription are so wide that the man who has a dollar will be able to invest as easily as the millionaire. First come will be first served, as the allotments will be made on application. The lists will close on or before July 20.

Mr. McKenna's announcement of the details of this loan was made in the house of commons. The chancellor said: "The time will come when the necessity of a further loan will become apparent and a prompt decision is required as it is undesirable that a big loan should be kept hanging over the market."

The chancellor said the total realized deficit between revenue and expenditure up to last Saturday amounted to £181,000,000. The daily war expenditures now amount to nearly £3,000,000 and are still increasing.

COAL LAD'S LOSE CASE

Government Wins Great Victory in Lackawanna Suit.

Washington, June 22.—In a far-reaching decision, which crowns with victory the government's fight to compel the railroads to disassociate themselves from their coal companies, the supreme court ordered that the Lackawanna railroad be enjoined from transporting coal of the Lackawanna Coal company under the so-called 1909 contract and reverses a decision of the lower courts, which was against the government.

Department of justice officials said the court's decision was a clear-cut victory in the government's long fight for disassociation of the railroads and their coal companies. Its effect, they said, is far-reaching.

Ten Thousand Ad Men in Chicago.

Chicago, June 22.—Ten thousand ad men are in attendance at the eleventh annual convention of the Associated Advertising clubs of the world. There was a monster advertising pageant of 1,000 persons. One hundred and fifty floats, representing allegorical scenes in American history and twenty bands were in the parade. The amount expended on the spectacle was more than \$100,000.

Former Congressman Cowherd Dead.

Pasadena, Cal., June 22.—Former Congressman William S. Cowherd of Missouri died here of aneuria, after an illness of six months. He came to California last January from Kansas City. He was fifty-five years old. The burial will take place in his old home at Lee's Summit, and funeral ceremonies will be held in Kansas City. He is survived by a widow.

Three Auto Speeders Hurt.

Joliet, Ill., June 22.—Joseph Smith is dying and John Gallagher and Joseph Doyle are seriously injured, following an accident to the automobile driven by Gallagher. The machine was speeding sixty miles an hour when it struck a rut in a road between Joliet and Manhattan, somersaulted and pinned the passengers under it.

WILSON PREPARING NOTE TO BRITAIN

Will Make New Representations on Misuse of Flag.

Washington, June 22.—New representations to Great Britain on misuse of the American flag by English steamers probably will be made in the new note which is being prepared to deal further with interruptions to neutral commerce. It was stated officially that as individual complaints of such instances had come to the state department they had been laid before the London foreign office, but that the next note would again deal with the subject generally.

At the state department it was said no official information was at hand on the German charge that the German submarine U-29 was rammed and sunk by a British steamer flying Swedish colors. American officials, while not admitting that the case has a bearing on the negotiations with Germany, are curious to know how the German admiralty got its information, inasmuch as everyone on the U-29 was reported lost.

The German claim respecting the U-29 was reported by Ambassador Gerard. The ambassador has as yet been unable to give any indication of the probable date of the reply to the last American note. It is assumed from unofficial reports, however, that it may be sent next week.

THREATEN TO LYNCH NEGRO

Joliet Convicts Make Demonstration Against Murder Suspect.

Joliet, Ill., June 22.—In a demonstration against "Chicken Joe" Campbell, the negro trusty suspected of slaying the wife of Warden Allen of the state penitentiary here, 1,800 convicts gathered in the main dining hall at the noon hour, rose to their feet and cried threats against Campbell.

One hundred guards, using clubs right and left, were required to restore order.

"Lynch him! Lynch him! Let's tear him apart!" were some of the cries that arose from all parts of the hall.

Mrs. Allen, before her marriage, five years ago, was Miss Odette Mazie Bordeaux, a comic opera favorite. She was a member of the original "Merry Widow" company. She took an active part in the arrangements of the prisoners and her influence did much toward establishing the honor system which placed the penitentiary in the front rank of modern prisons.

The murderer is said to have left finger prints in the bedroom and an expert from Chicago will analyze them. Eleven convicts, including Campbell, are in solitary confinement in connection with the crime.

Caminetti Case to Be Reviewed.

Washington, June 22.—The supreme court reconsidered its denial of a review of the conviction of F. Drew Caminetti of San Francisco, on charges of violating the white slave law, and granted a review. It also granted a review of the conviction of Maury I. Diggs, convicted with Caminetti in the same case.

Villa Force Defeated by Yaquis.

Nogales, Ark., June 22.—A detachment of the Villa troops ordered south to protect foreigners in the Yaqui valley was defeated by Yaqui Indians, twenty-five miles south of Empalme, Sonora, and lost forty men and a machine gun, according to advices received here. Twenty-five men also were lost in a previous skirmish. It was reported.

British Flyer Killed by Fall.

London, June 22.—Major Lumsden of the royal army flying corps was killed while flying over the Brooklands aviation course.

SOCIETY AND CLUBLAND

KATE SCHENCK

Give Dinner Party.

Mr. and Mrs. Earl Haist entertained guests at a dinner party Sunday, those present being Mr. and Mrs. Alex Lyle and sons, Will and Harold; Mr. and Mrs. John Haist, Mr. and Mrs. Otis McNeal, Mr. and Mrs. Oliver McNeal and sons.

Miss Lehmer Entertains.

Miss Bertha Lehmer gave a dinner party at noon Sunday, at which she entertained Mr. and Mrs. W. B. White and daughter, Margaret Elizabeth, and Mr. and Mrs. R. S. Price.

Mrs. Willhoyte Hostess.

Mrs. M. J. Willhoyte was the hostess of a dinner party given at noon Sunday, when she entertained complimentary to her daughter, Mrs. Elmer Walker, and daughter, Edna, of Aurora, Kan. Additional guests were Mr. and Mrs. W. O. Walker and Miss Mildred Hughbanks.

Four Generations Present.

Mrs. E. F. Teaney gave a dinner Sunday complimentary to her son-in-law and daughter, Mr. and Mrs. D. O. Hazelrigg of DeGrey, S. D. Other guests were a granddaughter, Mrs. Nellie Manley, and two great-grandsons, Oliver and Edwin Manley of Maryville, there being four generations present.

Thompsons Give Dinner.

Mr. and Mrs. Harve Thompson entertained with a dinner party Sunday as a courtesy to Mrs. Thompson's mother, Mrs. Lillie Shelton of Sheridan, Wyo., who is visiting relatives. Plates were laid for Mrs. Shelton, Mr. and Mrs. William Job and son, Eldon; Mr. and Mrs. W. A. White, Mr. and Mrs. W. H. Davenport and daughter, Edna; Mrs. H. Davenport of Chicago; Mr. and Mrs. Ernest Shelton and children, Mr. and Mrs. J. J. Knabb, Jesse and Richard Logan.

Collins Waldeier.

A wedding of interest to the friends of both young people took place in St. Joseph yesterday, when Miss Margaret E. Collins, daughter of Mrs. S. A. Collins of South Fillmore street, became the bride of Allie C. Waldeier, son of Mr. and Mrs. A. Waldeier of Parnell, the Rev. J. J. O'Neill officiating. They were attended by Miss Belle Collins, a sister of the bride, and Mr. Albert Schmitz, a cousin of the groom. Miss Collins was one of Nodaway county's most successful teachers, having taught in the county for the past six years. The groom is a successful young farmer. Mr. and Mrs. Waldeier will make their home on a farm south of Parnell. Their many friends extend best wishes for a long and happy married life.

McCaffrey-O'Brien Nuptials.

At 8 o'clock Tuesday morning in St. Patrick's church, Miss Katherine McCaffrey and Mr. Thomas O'Brien of Ravenwood were married by the Rev. Father Niemann. The bride was attended by Miss Catherine O'Brien, sister of the groom, as maid of honor, and Mr. John O'Brien acted as best man for his brother. Immediately after the ceremony breakfast was served at the home of the bride's mother, Mrs. Ellen McCaffrey, 502 East Jenkins street, to the following guests: Rev. Father Niemann, Mr. and Mrs. Thomas O'Brien, Mrs. Ellen McCaffrey, Miss Catherine O'Brien, Miss Mary O'Brien, Miss Anna Brant, Mr. and Mrs. J. H. McCaffrey, Mr. and Mrs. J. P. Leuck and children, Ellen Margaret, Mary Rose and Joseph P. Jr.; Mrs. Anna Brant, Mr. John O'Brien, Mr. James O'Brien and Charles F. McCaffrey, Mr. and Mrs. O'Brien will make their home on the groom's farm, ten miles southeast of Maryville.

McCann-O'Donnell Wedding.

Miss Margaret McCann of Clyde and Mr. W. O'Donnell of Gary, Ind., were married at 7 o'clock this morning at Conception abbey, Rev. Father Frowin officiating. Miss Marie McCann and Mr. Eugene McCann, sister and brother of the bride, were attendants. The bride wore a gown of white crepe meteor, with trimmings of shadow lace and pearls, and a flowing veil crowned with blossoms. She carried bride's roses. The maid of honor wore white lace over silk and carried pink carnations. After the ceremony a wedding breakfast was served at the home of the bride's parents, Mr. and Mrs. J. T. McCann of Clyde, to immediate relatives and officiating clergyman. Mr. and Mrs. O'Donnell left at noon for an extensive wedding trip through the west, which will include visits at the two California fairs, Seattle, Portland and other places of interest. They will be at home after August 15 at Gary, Ind. The out-of-town wedding guests were Mr. and Mrs. N. F. Webber and children, Marceline and Harold, of Creston, Ia.

Attorney L. C. Cook left Tuesday morning for Osceola, Mo., where he has business in court.

D. R. Eversole & Son

The Following Merchandise is Worth Your Consideration at This Time.

Palm Beach Cloth

The most popular summer material for suits, coats and skirts. Can be dry cleaned or washed. The weather will not trouble you if your garments are made of Palm Beach Cloth.

One grade 58 inches wide at a yard \$1.25
One grade, 36 inches wide at a yard .50

New Jap Silk Waists

Either in plain or embroidered designs just received. All sizes, choice of any style \$1.00

Summer Parasols Reduced

We have selected from our stock some fancy parasols ranging in price from \$1.25 to \$2.50. Choice of any parasol in this lot for \$1.00

Muslin Underwear Reduced One-Fourth

Choice of any garment we have in our stock this week at a reduction of ONE FOURTH OFF regular price. This does not include our Amifrench lingerie.

Ladies Hose Reduced

Ladies 50c light weight Lisle Hose, colors white, black and tan reduced to 35c a pair or three pairs for \$1.00.

Ladies Sleeveless Vests

Made from a fine quality lisle thread, size 36, value 50c—while they last we will sell three for \$1.00 or 35c each.

TO RENEW STRAWBERRY BEDS.

Cultivation and rejuvenation of Old Fields Should Begin at Once.

The work of renewing and cultivating old strawberry beds should begin immediately after the crop is harvested, according to Prof. F. W. Fawcett of the Missouri college of agriculture. The rows may be "barred off" to a desirable width by running a furrow along either side with a turning plow or the rows may be narrowed by plowing out one side only. In either case the ground is leveled and worked down by harrowing and cultivating.

Many growers prefer not to use a plow but to work out the middles between the rows with double shovels or other cultivators. An orchard disk, with the sections extended just enough to leave a row of proper width, has proven to be a very desirable implement for working out strawberry fields.

Perhaps the most generally satisfactory method of renewal of rows is to "bar off" on one side with a plow, turning out about half the old row. This plan will greatly increase the number of new plants that will stand in the row the following season above the number that will stand if the rows are "barred off" on both sides.

Plowing on one side leaves a row much less exposed to injury from possible dry weather later in the season. It also makes it possible, when desired, to maintain the field in a profitable productive condition for a longer time.

It is possible to maintain the field in a profitable productive condition for a longer time.

The rows should be worked out with hoes and the runners trained in until a desirable stand is obtained. A reasonably wide row with the plants about five or six inches apart gives very satisfactory results in point of size, quantity and color of the berries.

Cultivation should be sufficient to keep the ground free from weeds and in good tilth throughout the season.

How the Flow of a River is Measured.

If you see a man leaning over the railing of a bridge intently watching the river, with a telephone receiver at his ear do not think that the man is trying to talk to the fishes or to a diver below the surface. He is probably one of the government's engineers measuring the amount of water passing under the bridge. This is done by lowering an instrument known as a current meter, into the water at several points under the bridge to determine the speed of the water and by measuring the depths of the water at the same points. From such information the flow of the river at that particular time and height can be computed, and when such measurements have been made at a number of different heights the flow of the stream at any height can be determined. Then if a record of the height of the river is obtained each day from a river gage, the flow for each day can be computed.

Friends' Opinions

Convincing proof of Efficiency in our Banking Service is the fact that a large part of our new business arises from the recommendation of present patrons

Frequently new patrons tell us that they are establishing relations with this institution because we have so satisfactorily served their friends.

A consultation with one of our Officers will convince you of the superior Service we offer.

LOOK OUT FOR THE LOCUSTS

Cicada Due to Appear This Month—To Heal Harmed Trees.

The cicada, commonly known as the 17-year locust, is expected to appear in June this year in scattered localities covering much of the northern and central states lying between the Hudson and Mississippi rivers, extending along the Appalachian elevated plateau into northern Georgia and South Carolina. This particular brood made its last appearance in this territory in 1898.

The 17-year locust covers in its range nearly all of the United States from the Mississippi valley eastward. The curious features of its regular periodic appearances and its long subterranean life give it perhaps the greatest popular interest which attaches to any insect on this continent, and lead to many inquiries with every reappearance of any important brood.

There are two races of this insect: the 17-year race, which occurs in seventeen different broods over the northern and central United States, and the 13-year race, which occurs in different broods throughout the Southern States from Texas eastward.

When any of these broods are characterized by great swarms they naturally cause fears for the safety of trees. The actual damage, however, is slight and is accomplished by the female cicada when she cuts the bark of the tree in the deposition of her eggs.

While the expected brood is not an important one, it covers a much wider territory than any of the other 17-year broods. According to the records, the number of locusts to be expected over most of this territory is not great, except in the Northwest and in the South east.

A careful canvass of the whole cicada area was made by the Bureau of Entomology with the assistance of the state entomologists in 1898. These reports, if they may be relied upon, extend the range of the periodical cicada in Wisconsin and Michigan much farther north than any of the old records.

The localities assigned to this brood is North Carolina, South Carolina, and Georgia, and in eastern Kentucky and Tennessee, are, in the main, in counties in the elevated mountainous district, and the correctness of the reference to this brood is established by earlier records as well as indicated by the elevation.

Ordinary repellent substances, such as kerosene emulsion or carbolic-acid solutions, seem to have very little effect in preventing the oviposition of these insects. Some recent experience, however, indicates that trees thoroughly sprayed with Bordeaux mixture or a lime wash are apt to be avoided by the cicada, especially if there are other trees or woods in the neighborhood on

which they can oviposit.

The most reliable means of protecting nurseries and young orchards is by collecting the insects in bags or umbrellas from the trees in early morning or late evening, when they are somewhat torpid. Such collections should be undertaken at the first appearance of the cicada and repeated each day.

Vigorous young trees often recover in three or four years from the effects of a loss of, or injury to, a considerable percentage of their branches. However, it is difficult to overcome the unsymmetrical appearance which will commonly result from the indiscriminate pruning often necessary as a result of the female insects' work.

The worst affected branches should be removed. The less injured limbs may be coated on the wounded parts with grafting wax or moderately hard soap. These protective coverings should be renewed at least once a year, preferably in the spring, until the wounds are entirely healed over.

It may be expedient, in the case of a badly wounded recently budded or grafted tree, to cut it back nearly to the bud or graft, so that an entirely new top may be made.

In the case of older trees, the main object of treatment is to secure the rapid healing of the wounds and prevent their being used as points of secondary infection by other insects. The worst injured limbs in such trees should also be cut out, so that all the vigor of the plant may be directed to the remaining wood. The healing process may be accelerated by thorough cultivation and the use of fertilizers on the land about the trees attacked.

The scientists of the Bureau of Entomology are keeping close watch of the territory where the locusts are due to appear, with a view to minimizing the damage.

10,000 CONSUMPTIVES DIE

Federal Research Shows That Many Annually Succumb in West—Endangers Traveling Public.

That 10,000 consumptives annually go west to die is the statement made by the United States Public Health Service, as the result of investigations recently completed. The tuberculous population of Western Texas and New Mexico is estimated to exceed 50,000, and from 20 per cent to 80 per cent of the families have some member who is or was infected.

The consumptive population which has migrated from other states is more than 2,000 at Albuquerque, above 3,000 at El Paso, and 3,500 at San Antonio. The effects of the transportation of thousands of consumptives to and from the resort cities upon the health of fellow travelers, the dangers arising to the communities themselves from the influx of invalids, and the social and economic results, are the subject of a broad and interesting study.

The percentage of deaths from tuberculosis within a short period of arrival is lessening. This indicates that the educational propaganda to keep far advanced cases at home has been of benefit.

Dust, confinement, altitude, and parting from friends, are declared to be often detrimental to patients, especially those in the later stages of the disease. Cases of this nature should invariably be guided by professional advice. Accompaniment by friends when ever possible is urged.

The Public Health service warns all prospective health seekers of the difficulties they are bound to encounter, and advises all who are not sufficiently provided with funds to remain at home. No invalid should venture forth unless he has sufficient money to last at least six months. The chances of recovery are greatly lessened when poverty exists.

Whether the coming of thousands of consumptives into the arid region has been of benefit to that section is hardly considered a debatable question. The growth of cities has been favored, industries developed, and production encouraged, by the invalid class.

Consumptives are engaged in practically every occupation, and the business and professional life of many cities is carried on in large part by them. The effects upon wages has probably not been entirely negligible.

Prof. and Mrs. Joe Dyson of Fayette, Mo., are visiting Mrs. Dyson's parents, Mr. and Mrs. E. B. Sheldon. They will perhaps remain in Maryville during the summer, Prof. Dyson working in the interest of Central college, with which he is connected.

Drowned When Canoe Tips.
Holland, Mich., June 22.—John Bazzard of Kansas City, eighteen years old, was drowned when his canoe tipped over in the breakwater at Holland harbor. His companion, Fred Hubbard, clung to the overturned boat until rescued by the life saving crew.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of
Importance to the Man Who Runs a Car

There is a grinding sound in the rear axle or gears of my car which I cannot locate. When the wheel turns halfway around it grinds, and the rest of the way it runs smoothly. Can you explain this trouble?

It is a good plan to look for the simplest troubles first. If the sound is a rasping or scraping one it is probably due to dragging brake bands, or the drums may be out of true. If the brake bands are dragging loosen them up slightly. Unless the drums are not badly out of round it will be sufficient to loosen up the bands, but if this will not answer the drums should be trued up in a lathe or else replaced. The grinding noise may be due to a shaft that is bent, and it is more probable that an axle shaft instead of a transmission shaft would give trouble in this way. The bending of a shaft will cause any gear on it to alternately mesh too loosely and too tightly with its mating gear. This will cause a grinding sound. Whether this is the trouble can only be determined by inspection. The straightening of the shaft should be left to some man who has had experience, and probably you could not do it anyway because of lack of equipment.

Another possibility is that one of the roller bearings is causing the trouble. One of the rollers may be broken, although this is not very likely, or the roller race may be worn out of round.

I would like to replace my five passenger body with a seven. Will the extra overhang on the rear axle hurt the motor?

The extra load will not harm the motor if it is not allowed to labor on high gear. When it is evident that the car cannot climb a certain hill on high gear, rather than force it up, a shift to second should be made. The same applies when running on second gear and low gear is required. There is more danger of hurting the springs or wearing out the tires. Possibly it will be necessary to substitute stiffer springs. Unless the tires are amply large for the weight they are now carrying, oversizes should be put on, at least on the rear, where the greater load is.

Can you tell me of a solution to clean out a radiator which expels water that is very dark brown in color when emptying the radiator?

Dark brown water in a radiator is due to the suspension in the water of particles of dirt or rust. There is no necessity of applying a solution to the radiator that will dissolve these particles because they can be very easily removed by flushing the radiator with large quantities of water.

I have four dry cells located in the tool box of my machine which are used for starting the motor. They will last only about three weeks, whereas one set should last the whole season. There is no short circuit, and the connections seem to be all right. Can you tell me the trouble?

One possible cause is that the cells you are using are defective, or it may be that the cell is out of adjustment. You do not state the type of cell that you have, but if it is that vibrator design it is quite possible that your high battery consumption is due to the tremblers being out of adjustment. If you have this type of cell try cleaning the contact points of the tremblers, and then adjust each trembler until it is working well and produces a good spark at the plug.

The most likely cause of your difficulty is that you are using too few dry cells. It would be much better to connect up five or six in series, as the voltage generated by four is not enough to do the work.

The slips covering the cushions and top of my car, which is almost a new one, have become black and have grease spots on them. Can you tell me what will clean and remove the spots?

Chloroform will be found quite satisfactory for taking the grease spots out of your cushions and top, although it will not clean out any dust or dirt that has settled on them. In cleaning the cushions and top it is well to first brush the dust out thoroughly, then remove grease by the use of chloroform and finally wash thoroughly with castile soap and lukewarm water. Gasoline has often been suggested as a good cleaning fluid for such purposes, but gasoline is a solvent for rubber, and the material that tops and cushions are made of often contains a rubber compound that is injured by the use of gasoline.

What are the objections to a two cycle motor?

The objections to the two cycle motor are that it is difficult to throttle down, it is uneconomical and is not adaptable to high speeds as the four cycle.

Will one new patent piston ring in each cylinder give good results with the old rings of the ordinary type? If so, what groove should I put them in?

One new patent ring will improve the running of your motor, but naturally three such rings will be more effective. If you use only one ring it should be put into the top groove.

Recently I had the carbon removed from my cylinders, but even after that when running about fifteen miles per hour on top gear when I want to pick up quickly with my spark retarded below halfway the motor knocks very hard. What is the cause?

The fact that your motor knocks when the spark is halfway advanced when you are accelerating from a speed of fifteen miles an hour on high gear does not indicate that there is anything wrong with your motor. Try retarding the spark further under these conditions and see if the car does not run all right. The idea to keep in mind when using the spark lever is to set it at the point just below that at which the motor will knock under the particular conditions that the motor is operating under at any given time.

My crank case holds three gallons and three quarts of oil when up to the pet cock lever, and I have a dash light feed which shows a steady stream when I have the oil at the right level, but when I have the amount of oil I speak of the motor smokes. How can I stop it smoking and still know that I have enough oil to lubricate the motor?

The manufacturer of this motor should have set the oil level at the correct height. Therefore we would not advise doing anything to change the height of the oil in the crank case until you have made sure that the trouble is not elsewhere. Smoking may be due to loose fitting piston rings, worn pistons or worn cylinders or all of these combined. Poor oil might also be causing the motor to smoke, or it may be that the cooling system is not working properly, with the result that a large quantity of the oil is consumed because the motor runs hot. If smoking does not seem to be caused by any of these conditions it might be well to reduce the level of oil in the crank case, but before taking such a step you should confer with the manufacturer of the car or with some good repair man.

My motor stops when throttle is placed in certain notch on quadrant. When running slow around corners or over crossings and on speeding up when the throttle reaches a certain notch on the steering gear quadrant, the motor either stops or jerks about six or ten yards. What is the cause of this?

Probably with the throttle in a certain position some part of the throttle mechanism short circuits the ignition current. With the car running move the throttle lever until the motor starts to miss or stop; then stop the car and look for the trouble. It is also possible that the movement of the throttle interferes with the operation of the carburetor. See that the air valve is not affected. If the throttle and the auxiliary air valve are connected up, or if the throttle in any way controls the flow of gasoline from the jet or jets, this mechanism should be carefully inspected.

I have trouble with my car losing power and speed. On grades that should be made on high I have to go in second. At times when going up grades on second the car checks up as if the brakes had been applied. Then again it will gain speed; then slow up as before. What is the cause?

The peculiar action of your car is due to temporary disarrangement of some part of the ignition or carburetion systems. If the former is at fault the trouble must be caused either by a short circuit or a loose connection. Inspect the wiring thoroughly for defective insulation at which points the bare wires may be grounded on the metal parts of the car, thus deflecting the current from its regular path. Go over all connections and tighten up any that are loose. After doing this the motor should run all right if the trouble is with the ignition. If the carburetion system is causing your motor to run irregularly you must be getting an improper mixture at times. If the mixture is too rich black smoke will be seen at the exhaust, and if this is the case the trouble is probably caused by dirt under the float valve, or there is a small possibility that it is due to a sticking of the auxiliary air valve. This valve may remain closed temporarily so that too rich a mixture is delivered to the motor for a time. On the other hand, if the mixture is too lean, trouble may be the result of any of the following causes: The auxiliary air valve may stick open, thus allowing too much air to be delivered to the motor; the float may stick so that an insufficient supply of gasoline is the result. Too small a quantity of gasoline might also be the result of dirt in the spray nozzle or possibly in the feed pipe from the gasoline tank.

Will you please tell me how to prevent the throwing of oil from my valve tappet guides?

The leakage of oil out of valve tappet guides is due to the wearing away of the guides, so that there is more or less space between it and the tappet. When this condition exists the motion of the tappet carries the oil up from the crank case and allows it to flow out over the upper end of the guide. The only remedy is to fit new guides.

Deafness

Are You Deaf or Hard of Hearing?

Now is the ideal time to treat deafness. Ninety per cent of all deafness is caused by catarrh. Dr. Edwards of St. Louis has discovered and perfected an operation for catarrhal deafness which is remarkable for its many cures. There is no cutting and it is painless. I am now using this operation in Maryville with remarkable success. Every patient treated by me has been cured or greatly benefited.

MILL CREEK NOTES.

Miss Bernice Williamson visited Thursday with Miss Nona Clark.

Mr. and Mrs. Echor spent Sunday with Harry Anderson and family.

Harry Vail and daughter spent Sunday night with A. P. Swaney and wife.

Mrs. Williamson is spending a few days with her son, S. G. Williamson.

Mrs. L. Williamson and sons were the Sunday dinner guests of her parents, Jesse Bullock and family.
